Independent Auditor's Report

To the Shareholders of Jade Leader Corp.:

Opinion

We have audited the consolidated financial statements of Jade Leader Corp. and its subsidiary (the Group), which comprise the consolidated statements of financial position as at September 30, 2020 and 2019, and the consolidated statements of loss and comprehensive loss, changes in equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at September 30, 2020 and 2019, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 1 in the consolidated financial statements, which indicates that the Group incurred a net loss of \$400,849 during the year ended September 30, 2020 and, as of that date, a cumulative deficit of \$15,674,670. These conditions, along with other matters as set forth in Note 1, indicate that a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Other Information

Management is responsible for the other information. The other information comprises the information included in the Management Discussion and Analysis.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We obtained the Management Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in this auditor's report. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

• Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is John Leavitt.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

1. Nature and continuance of operations

Jade Leader Corp. ("Jade Leader" or "the Company") is engaged in the business of mineral exploration and development in Canada and the USA. The Company was incorporated under the laws of the Province of British Columbia, Canada and continued under the Business Corporations Act (Alberta). The address of its primary office is Suite 815, 808 - 4th Avenue SW, Calgary, Alberta, Canada, T2P 3E8. The Company's common shares are listed on the TSX Venture Exchange (the "Exchange") under the symbol "JADE".

Since inception, the efforts of the Company have been devoted to the acquisition, exploration and development of mineral properties. To date the Company has not received any revenue from mining operations and has not determined whether its mineral properties contain ore reserves that are economically recoverable.

The Company incurred a net loss of \$400,849 during the year ended September 30, 2020. The Company has a deficit of \$15,674,670 at September 30, 2020, (\$15,273,821 – September 30, 2019). The Company's ability to continue to explore and develop its mineral properties and to continue as a going concern is dependant upon its ability to raise additional equity financing. There is no assurance that the Company will be successful in achieving profitable operations given its early stage exploration, and no assurance that it will obtain financing. These material uncertainties cast significant doubt on the Company's ability to continue as a going concern. These financial statements do not include any adjustments which could be significant should the Company be unable to continue as a going concern.

2. Basis of presentation

a) Basis of presentation

These consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), effective for the period ended September 30, 2020 using the significant accounting policies outlined in Note 3. The statements were authorized for issue by the board of directors on December 17, 2020.

These consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments described in Note 12 and the decommissioning obligation described in Note 10. In addition, these statements have been prepared using the accrual basis of accounting except for cash flow information.

The presentation and functional currency of the Company is the Canadian dollar.

b) Principles of consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned US subsidiary, Jadex Corporation ("Jadex"). Jadex was incorporated by the Company on July 7, 2017, in Washington State, USA, to conduct its exploration and development business in the United States (refer to Note 7 - "Exploration and evaluation assets" for more information). All intercompany transactions and balances have been eliminated on consolidation. Subsidiaries are those entities that the Company controls through its power to govern the financial and operating policies of the subsidiary. Subsidiaries are fully consolidated from the date control is obtained and are de-consolidated from the date control ceases. The functional currency of Jadex is the Canadian dollar.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

3. Summary of significant accounting policies

a) New accounting policies

IFRS 16 - Leases

According to IFRS 16, all leases will be on the statement of financial position of lessees, except those that meet the limited exception criteria. The standard is effective for annual periods beginning on or after January 1, 2019. The standard is required to be adopted either retrospectively or using a modified retrospective approach. The modified retrospective approach does not require restatement of prior period financial information as it recognizes the cumulative effect of applying the standard to prior periods as an adjustment to opening retained earnings.

The Company adopted IFRS 16 on October 1, 2019 using the modified retrospective approach and applying certain practical expedients available upon transition. The Company has applied a practical expedient that allows the Company to apply a recognition exemption for leases with remaining lease terms of less than 12 months and leases of low value on the transition dates. As at September 30, 2020, there has been no material impact on the Company's financial reporting relating to the occupancy lease which terminates August 31, 2021. No other leases have been entered into during the year. The payments of these leases are disclosed in Note 18 to the consolidated financial statements.

b) Financial Instruments

The Company's financial instruments consist of the following:

Financial Assets Classification

Cash Financial asset measured at amortized cost Accounts receivable Financial asset measured at amortized cost

Financial Liabilities Classification

Accounts payable and accrued liabilities Financial liabilities measured at amortized cost

The Company initially records financial assets at fair value and subsequently measures these financial assets at either amortized cost or fair value on the basis of both the Company's business model for managing the financial assets and the contractual cash flow characteristics of the financial asset. A financial asset is measured at amortized cost if both of the following conditions are met:

- 1) The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows and.
- 2) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

If the financial asset is not measured at amortized cost as per the above, the financial asset is measured at fair value.

Financial asset measured at fair value

Financial assets measured at fair value are carried at fair value at each period end, with the related gains and losses recognized in profit or loss.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

Summary of significant accounting policies (continued)

b) Financial Instruments (continued)

Financial assets measured at amortized cost

Financial assets measured at amortized cost are recorded at fair value upon initial recognition, plus any applicable transaction costs that are directly attributable to the acquisition of the financial asset, and subsequently carried at amortized cost, using the effective interest method. A gain or loss on a financial asset that is measured at amortized cost is recognized in profit or loss when the financial asset is derecognized, impaired, or reclassified.

Financial liabilities measured at amortized cost

Financial liabilities measured at amortized cost are recorded at fair value upon initial recognition, less any applicable transaction costs that are directly attributable to the acquisition of the financial liability, and are subsequently measured at amortized cost using the effective interest method. A gain or loss on a financial liability that is measured at amortized cost is recognized in profit or loss when the financial liability is derecognized.

Cash

Cash includes cash and highly liquid Canadian dollar denominated investments in bankers' acceptances or term deposits with terms to maturity of 90 days or less when acquired as well foreign demoninated current accounts held by the Company. The counter-parties are financial institutions.

Impairment of financial assets

The Company recognizes a loss allowance for expected credit losses on financial assets that are measured at amortized cost using the "simplified method". At each reporting date, the Company measures the loss allowance for the financial asset at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. If at the reporting date, the financial asset has not increased significantly since initial recognition, the Company measures the loss allowance for the financial asset at an amount equal to the twelve month expected credit losses. The Company shall recognize in the consolidated statements of loss and comprehensive loss as an impairment gain or loss, the amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized.

The carrying amount of financial assets is reduced by any impairment loss directly, except in the case of accounts receivable, where the carrying amount is reduced through the use of an allowance account. When an account receivable is considered uncollectible, it is written-off against the allowance account. Subsequent recoveries of accounts receivable previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the reversal is recognized in profit or loss and is limited to the carrying amount that would have been determined had no impairment loss been recognized in prior years.

c) Provisions

Provisions are recognized when the Company has a present obligation, whether legal or constructive, as a result of a past event for which it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation discounted using the pre-tax, risk-free rate, updated at each reporting date.

Jade Leader Corp. Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

3. Summary of significant accounting policies (continued)

d) Decommissioning obligation

Decommissioning obligations include obligations related to future removal of property and equipment, and site restoration costs. A liability, for the fair value of environmental and site restoration obligations, is recorded in accordance with the broader policy described in "c) Provisions" above. Provisions for restoration costs do not include any additional obligations that are expected to arise from future disturbance. The amortization or unwinding of the discount applied in establishing the net present value of provisions is charged to earnings in a systematic manner. Other movements in the provision, including those from new disturbance, updated cost estimates, changes to the lives of operations and revisions to discount rates are capitalized to exploration and evaluation assets. The amounts included in capitalized costs are depleted using the unit-of-production method at such point that the mineral property achieves commercial production, or the costs will be written-off at such time that management considers that the value of the related property has been impaired.

e) Exploration and evaluation assets

The Company is in the exploration stage with respect to its investment in mineral properties. The Company expenses costs incurred prior to acquiring the right to explore an area as pre-acquisition and exploration costs. The Company capitalizes costs directly related to the acquisition, exploration and evaluation of mineral properties. Such costs include, but are not restricted to, geological, geophysical, drilling, trenching and sampling costs including the support costs and supplies required in relation thereto. These assets are recorded at cost and adjusted for impairments in value. Impairment is assessed when facts and circumstances suggest that the carrying amount of the asset may exceed its recoverable amount. In assessing impairment, exploration and evaluation assets are grouped into areas of interest. Management combines contiguous mineral claims, which are specific to a geographic area that encompasses the same prospective minerals, into one area of interest and assigns a name to this mineral property. Each named mineral property is considered an area of interest.

Exploration and evaluation assets are reviewed for impairment if there is an indication that the carrying amount may not be recoverable. When a review for impairment is conducted, the recoverable amount is assessed by reference to the higher of "value in use" (being the net present value of expected future cash flows of the relevant cash generating unit ("CGU")), or "fair value less costs to sell." Where there is no binding sale agreement or active market, fair value less costs to sell is based on the best information available to reflect the amount the Company could receive for the assets in an arm's length transaction.

The discount rate applied in calculating net present value of expected future cash flows, is based upon pre-tax discount rates that reflect current market assessments of the time value of money and the risks associated with the relevant cash flows, to the extent that such risks are not reflected in the forecasted cash flows.

If the carrying amount of the asset exceeds its recoverable amount, the asset impairment loss is charged to profit or loss and reduces the carrying amount of the asset. A previously recognized impairment loss is reversed if the recoverable amount increases as a result of a reversal of the conditions that originally precipitated the impairment. This reversal is recognized in profit or loss and is limited to the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized in prior years.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

3. Summary of significant accounting policies (continued)

e) Exploration and evaluation assets (continued)

One or more of the following facts and circumstances indicate that a specific area of interest should be tested for impairment:

- The period for which the entity has the right to explore in the specific area has expired during the period or will expire in the near future and is not expected to be renewed.
- Substantive expenditure on further exploration for, and evaluation of, mineral resources in the specific area is neither budgeted nor planned.
- Exploration for and evaluation of mineral resources in the specific area has not led to the discovery of
 potentially commercially viable quantities of mineral resources and the entity has decided to
 discontinue such activities in the specific area.
- Sufficient data exists to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or sale.

Where the Company's exploration commitments for an area of interest are performed under option agreements with a third party, the proceeds of any option payments under such agreements are applied to the area of interest to the extent of costs incurred. The excess, if any, is credited to operations. Option payments made by the Company are recorded as exploration and evaluation assets. Options are exercisable entirely at the discretion of the optionee and accordingly, are recorded as exploration and evaluation assets or recoveries when the payments are made or received. The proceeds on the sale of exploration and evaluation assets are applied to the area of interest to the extent of costs incurred and the excess, if any, is credited to operations. In some circumstances option payments received by or made by the Company are made in whole or in part through the issuance of common shares. The value of these share-based payments is calculated using the closing price of the shares on the date of issue as determined by the public exchange upon which they are listed as this is the most readily determinable value.

When the Company enters the development stage for an area of interest, the exploration and evaluation costs are transferred into mine development costs and all subsequent expenditures on the construction, installation or completion of infrastructure net of incidental revenue is capitalized. Upon commencement of commercial production, all mine development assets for the relevant area of interest are transferred to producing mine assets at which point the costs will commence being charged to profit or loss on a unit-of-production basis.

f) Property and equipment

On initial recognition, property and equipment assets are valued at cost, being the purchase price plus the directly attributable costs of acquisition to bring the assets to the location and condition necessary for the assets to be put into use. Subsequent to acquisition, these assets are recorded at cost less accumulated depreciation. Depreciation methods and rates by significant categories of property and equipment that are calculated to write off the cost of the assets, less estimated residual values, over their useful lives, are as follows:

	Depreciation method	Depreciation rate
Computer equipment and software	Declining balance	30% - 50%
Equipment	Declining balance	20%
Shipping containers	Declining balance	10%

Residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date. Changes to estimated residual values or useful lives are accounted for prospectively as a change in estimate.

Property and equipment are reviewed for impairment if there is an indication that the carrying amount may not be recoverable. When a review for impairment is conducted, the recoverable amount is assessed by reference to the higher of "value in use" (being the net present value of expected future cash flows of the relevant cash

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

3. Summary of significant accounting policies (continued)

f) Property and equipment (continued)

generating unit ("CGU")), or "fair value less costs to sell." Where there is no binding sale agreement or active market, fair value less costs to sell is based on the best information available to reflect the amount the Company could receive for the assets in an arm's length transaction.

The discount rate applied in calculating net present value of expected future cash flows, is based upon pre-tax discount rates that reflect current market assessments of the time value of money and the risks associated with the relevant cash flows, to the extent that such risks are not reflected in the forecasted cash flows.

If the carrying amount of the asset exceeds its recoverable amount, the asset impairment loss is charged to profit or loss and reduces the carrying amount of the asset. A previously recognized impairment loss is reversed if the recoverable amount increases as a result of a reversal of the conditions that originally precipitated the impairment. This reversal is recognized in profit or loss and is limited to the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized in prior years.

Gains or losses on disposals of property and equipment are determined by comparing the proceeds with the carrying amount of the asset and are included in other gains and losses in the statements of loss.

g) Flow-through common shares

Resource expenditure deductions for income tax purposes related to exploration and development activities funded by flow-through share arrangements are renounced to investors in accordance with income tax legislation. At the time of closing financing involving flow-through shares, the Company allocates the gross proceeds received as follows:

- Share Capital fair value of market price of the Company's non-flow-through shares;
- Warrant reserve if warrants are being issued, based on the valuation derived using the Black-Scholes option-pricing model; and
- Liability for obligation to flow-through shareholders equal to the premium, if any, investors pay for
 the flow-through feature over the fair value of the share capital without the flow-through feature,
 representing the estimated value of the tax deductions that the Company is obligated to renounce to
 the investors.

At the end of each reporting period, the Company records an adjustment to its deferred tax expense/liability accounts for the taxable temporary difference arising from the transfer of tax benefits to investors pursuant to flow-through share agreements. For this adjustment, the Company considers the tax benefits to have been effectively transferred if it has incurred the qualifying expenditures by the end of the reporting period and expects to fully renounce the expenditures. This deferred tax impact is recognized in other income when the expenditures have been incurred and renunciation is expected. To the extent that the Company has deferred tax assets, in the form of unutilized tax losses carry forward and other unused tax deductions, the Company uses the deferred tax assets to reduce its deferred tax liability that otherwise would be recognized.

If the Company has renounced the expenditures to the investors, the liability for obligation to flow-through shareholders is recognised as other income on the basis to which the qualifying expenditures are incurred in relation to the total amount of qualifying expenditures the Company has agreed to incur.

h) Significant accounting judgments and estimates

The preparation of these consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets, liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual outcomes could differ from these estimates. Circumstances could arise over the years that would require material revisions to these estimates. Changes in assumptions could have a material effect on the fair value of estimates.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

3. Summary of significant accounting policies (continued)

h) Significant accounting judgments and estimates (continued)

These consolidated financial statements include judgments and estimates that, by their nature, are uncertain. The impacts of such judgments and estimates are pervasive throughout the consolidated financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods, if the revision affects both current and future periods. These judgments and estimates are based on historical experience, current economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances and are discussed below:

Exploration and evaluation assets

The carrying values of exploration and evaluation assets and property and equipment that are included in the Statements of Financial Position, include the assumptions that are incorporated into the impairment assessments, and the amount of depreciation and/or impairments that are included in the statement of loss; (refer to Note 1 - "Nature and continuance of operations").

In assessing whether an impairment loss should be recorded on Exploration and Evaluation Assets, management considers the four factors outlined in Note 3 f) to the financial statements. A number of assumptions are required in making valuation assessments, including about mineral prices, continued exploration activity in the surrounding areas increasing the likelihood of being able to option out the property, and the availability of future financing to further develop the property failing the optioning out of the property. As the properties of the Company are at the grassroots level, they are not yet at the stage where there are assessments of possible or probable reserves. Consequently any estimates of value of the properties will be difficult. There is a risk that the properties could have little or no value if exploration activities in the surrounding areas cease, mineral prices decrease significantly making any extraction, regardless of quantities uneconomical or the Company is unable to acquire future financing to enable exploration before the claims expire.

• Decommissioning obligations

The amount of decommissioning obligations and the inputs used in determining the net present value of the liabilities for decommissioning obligations included in the Statements of Financial Position are estimated and incorporate assumptions made by management of interest rates and future inflation rates.

Share-based compensation and warrants

The value of share-based compensation expense in the Statements of Loss and Comprehensive Loss and the value of warrants that have been issued in connection with private placements included in the Statements of Financial Position, are valued using valuation models and incorporate assumptions made by management of stock volatility, interest rates and exercise periods.

Government incentives

The collectible amount of government incentives affect the carrying value of receivables and exploration and evaluation assets and are subject to review by granting authorities. Reductions in the amounts recoverable are possible and can not be predicted in advance.

Functional currency

Management has assessed the functional currency to be the Canadian dollar when recording the transactions of its wholly owned subsidiary. In accordance with IAS 21, a number of factors are considered in determining the functional currency of an entity. When indicators are mixed and the functional currency is not obvious,

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

3. Summary of significant accounting policies (continued)

h) Significant accounting judgments and estimates (continued)

management uses its judgment to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions.

i) Share-based payment transactions

The fair value of share options granted to employees is recognized as an expense over the vesting period or in the period the options were granted if they are vesting immediately with a corresponding increase in the equity-settled share based payment reserve in equity. Employees, for the purpose of this calculation, also include individuals who provide services similar to those performed by a direct employee, including directors and consultants of the Company. The fair values of the options granted is measured using the Black-Scholes Option Pricing Model taking into account the terms and conditions upon which the options were granted. Consideration received on the exercise of stock options is recorded as share capital and the related equity-settled share based payment amount is transferred to share capital. If options expire without exercise, the value associated therewith is transferred from equity-settled share based payment reserve to other reserves.

j) Loss per share

Basic loss per common share is calculated by dividing the net loss attributable to common shareholders by the weighted average number of common shares outstanding for the year. Diluted per share amounts reflect the potential dilution that could occur if securities or other contracts to issue common shares were exercised or converted to common shares. Only "in-the-money" dilutive instruments impact the dilution calculations and potentially dilutive instruments shall only be treated as dilutive when their conversion to ordinary shares would decrease earnings per share or increase loss per share. Refer to Note 11 for a summary of options and warrants outstanding that could potentially dilute basic earnings per share in the future, but were excluded from the calculation in the periods disclosed because their effect was anti-dilutive.

k) Income taxes

Income tax on net profit or loss for the years presented is comprised of current and deferred tax as applicable. Income tax pertaining to profit or loss is recognized in earnings or loss; income taxes pertaining to items recognized directly in equity are recorded through equity. Current tax is the tax expected to be payable on the taxable income for the year calculated using rates that have been enacted or substantively enacted by the balance sheet date. It includes adjustments for tax expected to be payable or recoverable in respect of previous periods.

Deferred tax is provided for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: goodwill not deductible for tax purposes, and the initial recognition of assets or liabilities that affect neither accounting nor taxable profit. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date. Deferred tax assets are only recognized to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future and future taxable profit will be available against which the temporary difference can be utilized.

I) Government incentives

Through its exploration, the Company has benefited from government grants. These incentives are not repayable provided that the Company meets the requirements of the agreement, the most significant of which is that the incentives apply to qualifying expenditures. Qualifying expenditures are defined broadly within the agreement as all reasonable expenses for contracted services, machinery rental, transportation of machinery, personnel and supplies or other approved costs in connection with specific exploration programs. The Government grants are recognized when there is reasonable assurance that the Company will comply with the conditions of the grant and the grants will be received. The incentives reduce the mineral property costs to

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

3. Summary of significant accounting policies (continued)

I) Government incentives (continued)

which they pertain in the period that the qualifying exploration expenditures are incurred or when collectability is reasonably assured if this is later. These Government incentives are subject to review by the relevant granting authorities, and by their nature are subject to measurement uncertainty. Adjustments, if any, resulting from such a review are recorded in the period during which the final grant payment amount is assessed by the governing agency.

m) Foreign currencies

Both the presentation currency and functional currency of the Company is the Canadian dollar. The functional currency of its wholly owned US subsidiary is the Canadian dollar. Transactions in currencies other than the functional currency are recorded at the rates of exchange prevailing on the transaction dates. At each financial statement reporting date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing on the date of the statement of financial position. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Non-monetary items that are carried at fair value and were measured in a foreign currency are translated at the rate prevailing at the date when the fair value was determined. Foreign exchange gains and losses on the foregoing transactions are recorded in profit or loss.

n) Leases

The Company leases office space pursuant to a lease agreement that does not transfer substantially all of the risks and rewards incidental to ownership. The lease obligations are recognized as an expense on a straight-line basis over the term of the lease.

4. Cash

Cash is comprised of:

		Sept 30, 2020		Sept 30, 2019
Current bank accounts	\$	259,512	\$	400,755
Cash held in foreign currencies		11,615		5,500
	\$	271,127	\$	406,255
5. Accounts receivable	-		-	
		Sept 30, 2020		Sept 30, 2019
Trade receivables	\$	Sept 30, 2020 595	\$	Sept 30, 2019 467
Trade receivables Related party receivables	\$		\$	
	\$	595	\$	467

6. Short-term Investments

During the year ended September 30, 2013, the Company acquired shares in North Sur Resources Inc. through the sale of a mineral property option. During the year ended September 30, 2017, North Sur Resources Inc. shares were transferred from the TSX Venture Exchange to the NEX and on March 28, 2018, the shares were delisted. Consequently, the investment was written off during the year ended September 30, 2018. On September 14, 2020, Mindset Pharma Inc. announced that it had completed a business combination with North Sur Resources Inc. As a result of this transaction, the Company received 4,000 Mindset Pharma shares in exchange for 200,000 North Sur Resources Inc. shares with an effective date of July 16, 2020. Mindset Pharma began the preparation of listing documents for a proposed application to list its securities on the Canadian

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

6. Short-term Investments (continued)

Securities Exchange ("CSE"). As of December 17, 2020, Mindset Pharma has not received approval for listing on the CSE, therefore no value has been established for the shares held by the Company and consequently the investment has not been recorded in the Company's financial statements.

7. Exploration and evaluation assets

Mineral properties are recognized in these consolidated financial statements in accordance with the accounting policies outlined in Note 3(e) "Exploration and evaluation assets". Accordingly, their carrying values represent costs incurred to date, net of recoveries, abandonments and impairments. The recoverability of these amounts is dependent upon the existience of economically recoverable mineral reserves; the acquisition and maintnenance of appropriate permits, licenses and rights; the ability of the Company to obtain necessary financing to complete the development of properties where necessary, and upon future profitable operations; or alternatively, upon the Company's ability to recover its costs through a disposition of its interests.

DJ Jade Project, Washington State, USA

On August 28, 2017, the Company announced its acquisition of the DJ Jade project, in Washington State, USA, through a combination of Option Agreement and staking. The gross costs and impairments recorded for the DJ Jade project at September 30, 2020 are \$552,133 and \$Nil, respectively (September 30, 2019 - \$547,168 and \$Nil, respectively).

The property, consisting of 18 existing and recently filed Lode Claims, covers an area of slightly more than 140 hectares. In fiscal 2019 the Company completed the acquisition of 100% of the optioned claims, subject to a 2% Net Smelter Royaltly, ("NSR"), by having made a total of US \$86,000 in property payments, and having incurred exploration costs of US \$80,000 in accordance with the terms and timelines of the option agreement. The Company has the option to acquire one-half (1%), of the Royalty for the sum of US\$500,000 in cash or equivalent value in Common shares of the Company. The Optionor also granted the Company the right, upon written notice, to acquire the remaining half, (1%), of the Royalty for the sum of US\$1,000,000 in cash or equivalent value in Common Shares of the Company, thereby extinguishing the Royalty of the Optionor.

On July 20, 2017, the Company entered into an Assignment and Novation Agreement, with Jadex (the Company's wholly-owned subsidiary). Jadex agreed that it shall be bound by, observe and perform the duties and obligations of the Company, for the assigned interests.

Wyoming Jade Fields, Wyoming, USA

Wyoming Jade Fields is comprised of five properties. The Company has acquired, by staking, 99 Mineral Lode Claims covering in excess of 1,800 acres. On July 15, 2018, Jadex entered into an Option Agreement to acquire a 100% interest in an existing Lode Claim (20.7 acres). The acquisition of the 100% interest, subject to a 2% NSR, was completed during fiscal 2019 with the Company having made a total of US\$35,000 in property payments and having incurred exploration costs of US\$60,000 in accordance with, and subject to the timelines outlined, in the Option Agreement. The Company may elect, upon written notice, to acquire one half (1%) of the NSR for US\$20,000 in cash. The Optionor also granted the Company the right, upon written notice, to acquire the remaining half (1%) of the NSR for US\$30,000 in cash, thereby extinguishing the NSR of the Optionor. The gross costs and impairments recorded for the Wyoming Jade Fields project at September 30, 2020 are \$551,350 and \$Nil respectively (September 30, 2019 - \$404,188 and \$Nil respectively).

Keithly Mountain, British Columbia

During fiscal 2017, the Company acquired by staking a prospective jade property in the Cariboo Goldfields in central British Columbia called Keithly Mountain. During the year ended September 30, 2019, the Company recognized an impairment equal to the full amount of the expenditures incurred on the property as it

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

7. Exploration and evaluation assets (continued) Keithly Mountain, British Columbia (continued)

determined that it would no longer continue to explore the Keithly Mountain property and would allow the claims to lapse.

Tell, Yukon

The Company acquired 100% of the expanded Tell mineral property through staking. The Company holds 193 claims covering slightly in excess of 4,000 (2019 – 4,000) hectares located approximately 140 kilometres east of Mayo, Yukon. The gross costs and impairments recorded to the Tell project at September 30, 2020 are \$452,167 and \$Nil, respectively (September 30, 2019 - \$449,832 and \$Nil, respectively).

A summary of exploration and evaluation expenditures by category for the years ended September 30, 2020 and September 30, 2019 appears below:

Year ended September 30, 2020		Wyoming, USA	Washington, USA	Yukon
,	Total	Wyoming Jade Fields	DJ Jade Project	Tell

Balance, September 30, 2019	389,095	143,402	139,240	-	106,453
Total exploration and evaluation assets September 30, 2019	1,401,188	404,188	547,168	-	449,832

From time to time, the Company is required to advance amounts to service providers prior to their commencing exploration work on the mineral interest. The advance is applied to the invoiced services, generally through the final invoice. As these advance's pertain to costs that form part of the long-term exploration and evaluation assets, they are classified as long-term. At September 30, 2020, the Company held \$4,357 in respect of Wyoming Jade Fields in exploration and evaluation asset advances and deposits (September 30, 2019 - \$4,357).

8. Property and equipment

	F	rop	erty and equipm	ty and equipment

Sales tax payable		287	285
	\$	40,996	\$ 86,829
10. Decommissioning obligation	-		
			Yukon
			Tell
Balance at September 30, 2020 and September 30, 2019			
•			\$ 12,750

The above noted obligation represents costs to restore the mineral exploration properties, including the costs of filling trenches and re-vegetation if applicable. Management believes that there are no other significant legal and constructive obligations as at the respective year ends for current and future decommissioning obligations and restoration costs. The year-end present value of the decommissioning obligation was determined using a risk-free rate of 0.25% (2019 - 1.58%) and an inflation rate of 0.70% (2019 - 1.9%) for the year ended September 30, 2020. The timing of future decommissioning costs is uncertain, as the costs will not be incurred until the Company gives up its legal right to explore the property or the current land use permits expire in October 2021 at which time the reclamation has to have been completed. No accretion expense has been recorded in both the current and comparative years because the amount is considered to be immaterial.

2020

On June 17, 2020, the Company closed a non-brokered private placement share and warrant issue for 9,000,000 common units at \$0.05 per unit comprised of 9,000,000 common shares and 4,500,000 common share purchase warrants for gross aggregate proceeds of \$450,000. Each common unit was comprised of one common share and one half of one common share purchase warrant. Each common share purchase warrant entitles the holder to purchase one additional common share at a price of \$0.10 per share until June 17, 2022. In valuing the warrants, the Company applied a proration of proceeds method to the components incorporating the Black-Scholes Pricing model assuming a volatility of 70.1%, a risk free rate of 0.29%, a 2 year warrant life and a 0% dividend rate. In connection with this financing, the Company paid finder's fees of \$2,000 which have been included as part of the share issuance costs that are deducted from the proceeds of the financing that are credited to the Common Share Capital. Related parties, comprised of officers and directors, acquired 1,260,000 of the total units.

2019

On October 12, 2018, the Company closed the first tranche of the private placement share and warrant issue for 3,865,816 common units at \$0.25 per unit comprised of 3,865,816 common shares and 3,865,816 common share purchase warrants for gross aggregate proceeds of \$966,454. Each common unit was comprised of one common share and one common share purchase warrant. Each common share purchase warrant entitles the holder to purchase one additional common share at a price of \$0.40 per share until October 12, 2020. In valuing the warrants, the Company applied a proration of proceeds method to the components incorporating the Black-Scholes Pricing model assuming a volatility of 135.80%, a risk free rate of 2.27%, a 2 year warrant life and a 0% dividend rate. In connection with this financing, the Company paid finder's fees of \$27,700 which have been included as part of the share issuance costs that are deducted from the proceeds of the financing that are credited to Common Share Capital.

On October 23, 2018, the Company closed the second tranche of the private placement share and warrant issue for 730,000 common units at \$0.25 per unit comprised of 730,000 common shares and 730,000 common share purchase warrants for gross aggregate proceeds of \$182,500. Each common unit was comprised of one common share and one common share purchase warrant. Each common share purchase warrant entitles the holder to purchase one additional common share at a price of \$0.40 per share until October 23, 2020. In valuing the warrants, the Company applied a proration of proceeds method to the components incorporating the Black-

Notes to the Consolidated Financial Statements

b) Issued and outstanding common share capital (continued)

Scholes Pricing model assuming a volatility of 135.38%, a risk free rate of 2.27%, a 2 year warrant life and a 0% dividend rate. In connection with this financing, the Company paid finder's fees of \$1,250 which have been included as part of the share issuance costs that are deducted from the proceeds of the financing that are credited to Common Share Capital.

During February 2019, 250,000 warrants exercisable at \$0.10 per share, expiring April 17, 2019 were exercised for total proceeds of \$25,000.

During March 2019, 2,950,000 warrants exercisable at \$0.10 per share, expiring March 24, 2019 were exercised for total proceeds of \$295,000 and 50,000 warrants exercisable at \$0.10 per share, expiring April 17, 2019 were exercised for total proceeds of \$5,000.

During June 2019, 280,000 options exercisable at \$0.10 per share, expiring July 10, 2019 were exercised for total proceeds of \$28,000.

During July 2019, 515,000 options exercisable at \$0.10 per share, expiring July 10, 2019 were exercised for total proceeds of \$51,500.

Subsequent to September 30, 2020 and prior to December 17, 2020, the date of these financial statements no shares were issued, nor cancelled and returned to treasury.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

- 11. Share capital, stock options and warrants (continued)
- d) Stock option transactions (continued)

The Company has an option plan ("the Plan"), under which up to 10% of the issued and outstanding common shares are reserved for issuance. Under the Plan, the options that have been granted expire at the earlier of: five years from the grant date, the date at which the Directors determine, or 60 days from the date on which the optionee ceases to be a director, officer, employee or consultant. The exercise prices of the options granted comply with the rules of the stock exchange or exchanges on which the shares are then listed, which prices reflect trading values at that time.

Options granted vest immediately to optionees, however, vesting limitations may be imposed at the discretion of the board of directors. All of the options outstanding at the respective year ends have vested.

Subsequent to September 30, 2020 and prior to December 17, 2020, the date of these financial statements no options were issued, expired and none were exercised.

e) Warrant transactions and warrants outstanding

The warrants summarized below may be exercised to acquire an equal number of common shares.

		Balance	\A/~~~~	W/	Wa	Balance
Exercise price	Expiry	Sept 30, 2019	Warrants Issued	Warrants Exercised	Warrants Expired	Sept 30, 2020
			issueu	LACICISCU	Lxpiieu	
\$0.21**	October 12, 2021**	3,865,816	-	-	-	3,865,816
\$0.21**	October 23, 2021**	730,000	-	-	-	730,000
	December 28,					
\$0.30	2021*	393,750	-	-	-	393,750

	Total	5,095,816	4,500,000	-	-	9,595,816

^{*}On December 2, 2019, the Company extended the expiry dates for certain warrants by two years as follows; 1) 393,750 warrants expiring on December 28, 2019 will now expire on December 28, 2021 and 2) 106,250 warrants expiring January 11, 2020 will now expire on January 11, 2022.

^{**}In September, 2020 the Company announced the extension of expiry dates and repricing of these warrants. In October, 2020 the final details approved by the TSX Venture Exchange were announced resulting in: 1) 3,865,816 warrants being repriced from \$0.40 per share to \$0.21 per share and the expiry date being adjusted to October 12, 2021 from October 12, 2020 and 2) 730,000 warrants being repriced from \$0.40 per share to \$0.21 per share with the expiry date being adjusted to October 23, 2021 from October 23, 2020.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

- 11. Share capital, stock options and warrants (continued)
- e) Warrant transactions and warrants outstanding (continued)

Subsequent to September 30, 2020 and prior to the date of these financial statements, no warrants were issued and none expired, nor were exercised. On October 2, 2020, expiry dates and pricing for warrants were adjusted as indicated in the table above.

12. Financial instruments

Financial instruments recorded at fair value are classified using a fair value hierarchy that prioritizes the inputs to fair value measurements. The three levels of fair value are summarized below:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 Inputs other than quoted prices that are observable for assets or liabilities either directly, (i.e. prices), or indirectly, (i.e. derived from prices); and
- Level 3 Inputs that are not based on observable market data.

The following summarizes the categories of the various financial instruments:

	Sept 30, 2020		Sept 30, 2019	
	Carrying Value			
Financial assets measured at amortized cost:				
Cash	\$ 271,127	\$	406,255	
Accounts receivable	6,406		6,458	
	\$ 277,533	\$	412,713	
Financial liabilities measured at amortized cost:				
Accounts payable and accrued liabilities	\$ 40,709	\$	86,544	

The above noted financial instruments are exclusive of any commodity tax.

The carrying value of financial assets and liabilities measured at amortized cost approximates fair value due to the short-term nature of the instruments. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest or credit risks arising from these financial instruments.

The Company undertakes transactions denominated in US currency through its exploration in the US; consequently, it is exposed to exchange rate fluctuations. The Company will acquire US funds from time to time to settle US\$ denominated liabilities. At September 30, 2020, the Company had US\$8,152 (CDN\$10,874) (September 30, 2019 – US\$3,359 (CDN\$4,759)) in a US denominated bank account. The effect of a foreign currency increase or decrease of 10% on this cash holding would result in an increase or decrease of CDN\$1,087 (September 30, 2019 – CDN\$476). Additionally, at September 30, 2020, accounts payable and accrued liabilities include liabilities of US\$8,071 (CDN\$10,766) (September 30, 2019 – US\$30,670 (CDN\$40,832)) that must be settled in US\$. The effect of a foreign currency increase or decrease of 10% on this liability would result in an increase or decrease of CDN\$1,077 (September 30, 2019 – CDN\$4,083) to the amount payable.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

13. General and administrative expenses

	Sept 30, 2020	Sept 30, 2019
Administrative consulting fees	\$ 90,156	\$ 72,807
Occupancy costs	52,236	55,362
Office, secretarial and supplies	40,269	60,012
Travel and promotion	30,477	85,481
Insurance	16,513	14,091
Computer network and website maintenance	2,620	4,576
Stock-based compensation	50,980	224,519
Salaries and benefits	-	5,513
Miscellaneous	7,621	7,099
Total general and administrative expenses	\$ 290,872	\$ 529,460

14. Share-based payment transactions

2020

On November 19, 2019, the Company issued 150,000 options that may be exercised at \$0.225 per share to November 19, 2023 and 125,000 options that may be exercised at \$0.225 per share to November 19, 2022. The 150,000 options expiring November 19, 2023 were valued at \$30,840 incorporating the Black-Scholes Options Pricing model assuming a 4-year term, volatility of 170.20%, a risk-free discount rate of 1.45% and a dividend rate of 0%. The 125,000 options expiring November 19, 2022 were valued at \$20,140 incorporating the Black-Scholes Options Pricing model assuming a 3-year term, volatility of 122.05%, a risk-free discount rate of 1.51% and a dividend rate of 0%.

2019

On October 1, 2018, the Company issued 75,000 options that may be exercised at \$0.25 per share to September 30, 2021. The options were valued at \$11,438 incorporating the Black-Scholes Options Pricing model assuming a 3 year term, volatility of 130.67%, a risk free discount rate of 2.31% and a dividend rate of 0%.

On May 23, 2019, the Company issued 50,000 options that may be exercised at \$0.21 per share to May 23, 2022. The options were valued at \$10,500 incorporating the Black-Scholes Options Pricing model assuming a 3 year term, volatility of 400%, a risk free discount rate of 1.56% and a dividend rate of 0%.

On August 19, 2019, the Company issued 1,230,000 options that may be exercised at \$0.30 per share to August 19, 2022. The options were valued at \$202,581 incorporating the Black-Scholes Options Pricing model assuming a 3 year term, volatility of 85.32%, a risk free discount rate of 1.31% and a dividend rate of 0%.

15. Loss per share

The dilutive effect of stock options and warrants was calculated using the treasury stock method. This method calculated the number of incremental shares by assuming the outstanding in-the-money stock options and warrants are exercised, and then reduced by the number of shares assumed to be repurchased from the issuance proceeds, using the average market price of the Company's common shares for the period. As the Company experienced a loss for the years ended September 30, 2020 and 2019, no dilution resulted and consequently no adjustments were made in arriving at diluted weighted average number of common shares.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

16. Income taxes

Rate Reconciliation:

The combined provision for taxes in the statement of loss and comprehensive loss reflects an effective tax rate which differs from the expected statutory rate as follows at September 30:

	2020 Consolidated	2019 Consolidated
	\$	\$
Loss before income taxes	(400,849)	(588,422)
Rate reconciliation	24.75%	26.75%
Computed expected expense (recovery) based on a combined rate of 24.75% (2019 – 26.75%)	(99,210)	(157,403)
Differential tax rate of foreign jurisdiction	2,214	3,468
Non-deductible items and other	15,855	89,408
Unrecognized deferred tax asset	63,676	(261,598)
Change in tax rate	17,465	326,125
Income tax expense	-	-

The combined statutory rate is 24.75% for 2020 (2019 - 26.75%). The deferred combined statutory tax rate is expected to be 23.00% for 2020 and subsequent years (2019 - 23.00%).

Temporary differences and tax loss not recognized for accounting purposes:

	2020	2019
Non-capital loss carry-forwards	\$ 3,579,826	\$ 3,273,886
Capital loss carry-forwards	117,424	117,424
Property and equipment	48,095	74,698
Exploration and evaluation assets	4,407,889	4,529,983
Share issuance costs	43,124	49,623
Accrued interest expense	21,417	-
US net operating loss	753,640	556,096
Total	\$ 8,971,415	\$ 8,601,710

As future taxable profits of the Company are uncertain, no deferred tax asset has been recognized. As at September 30, 2020, the Company had unused non-capital loss carry-forwards of approximately \$3,580,000 (2019 - \$3,274,000) that expire between the years 2026 and 2040. Capital loss carry-forwards may be carried forward indefinitely. The Company has unused US net operating loss carry forwards of approximately \$565,000 USD, (2019 - \$420,000 USD), that may be carried forward indefinitely.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

17. Related party balances and transactions and key management remuneration

The Company is considered a related party to CANEX Metals Inc. ("CANEX") because of its common directors, officers and key management personnel that have some direct financial interest in both the Company and CANEX. In addition, related parties include members of the Board of Directors, officers and their close family members. 635280 Alberta Ltd., a company controlled by Jean-Pierre Jutras, an officer and director of Jade Leader, Lunacees Enterprises Ltd., a company controlled by Cornell McDowell, a director of Jade Leader, and Vector Resources Inc., a company controlled by Shane Ebert, a director of Jade Leader, are also considered related parties.

The following amounts were charged to (by) related parties during the year ended September 30:

		2020	2019
Key management remuneration			
President and Director	а	\$ (84,500)	\$ (104,371)
Corporate Secretary	b	(31,309)	(48,285)
Chief Financial Officer	С	(7,692)	(10,425)
Total management remuneration		\$ (123,501)	\$ (163,081)

Management compensation payable to "key management personnel" during the years ended September 30, 2020 and 2019 is reflected in the table above and consists of consulting fees paid or payable to 635280 Alberta Ltd., a company controlled by Jean-Pierre Jutras, as well as the Corporate Secretary and the Chief Financial Officer. Directors are not paid directors' fees. Officers and directors are compensated through the granting of options from time-to-time. Refer to Note 14 - "Share-based payment transactions" for detail relating to options issued during the years ended September 30, 2020 and September 30, 2019. Key management personnel are defined as those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including any director of the Company.

		Sept 30, 2020	Sept 30, 2019
Other related party transactions:			
CANEX Metals Inc.			
General and administrative and secretarial costs paid	d	\$ (2,613)	\$ (2,808)

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

17. Related party balances and transactions and key management remuneration (continued)

- a) Consulting fees for the President's services were billed by 635280 Alberta Ltd., a company controlled by Jean-Pierre Jutras. Consulting services that relate directly to mineral property exploration are capitalized to exploration and evaluation assets; the remainder is expensed. During the year ended September 30, 2020, \$24,625 (2019 \$62,594) was capitalized to exploration and evaluation assets, and \$59,875 (2019 \$41,777) was expensed through general and administrative expenses.
- b) The Corporate Secretary provides services to the Company on a contract basis.
- c) The Chief Financial Officer provides services to the Company on a contract basis.
- d) During the years ended September 30, 2020 and 2019, the Company incurred certain administrative expenses on CANEX's behalf that were subsequently billed to CANEX on a quarterly basis. Further, CANEX incurred certain administrative costs on behalf of the Company that were billed on a quarterly basis. Since January 2015, the Company has subleased office space to CANEX. The Company renewed its sublease with CANEX on August 1, 2020, terminating August 31, 2021, (see Note 18 "Commitments"). CANEX and the Company share two common officers and two common directors.
- e) During the years ended September 30, 2020 and September 30, 2019, geological consulting services were provided by Lunacees Enterprises Ltd., a company controlled by Cornell McDowell, a director of Jade Leader.

18. Commitments

a) On August 1, 2020, the Company entered into a new leasing arrangement for office space, terminating August 31, 2021. Pursuant to the agreement, the Company is committed to pay base lease costs plus additional rent, which includes its proportionate share of costs incurred in the operation, maintenance, management and supervision of the property as defined by the landlord's current lease for the premises. Additionally, Jade Leader entered into a sublease agreement with CANEX Metals terminating August 31, 2021.

As at September 30, 2020, the committed lease costs to the termination of the lease are as follows:

October 1, 2020 to August 31, 2021	
\$	
9,708	
27,876	
37,584	
17,226	
20,358

20. Segment disclosures

During the years ended September 30, 2020 and September 30, 2019, the Company was engaged in mineral exploration and all exploration activities were undertaken in Canada and/or the United States. Activities undertaken in both countries were similar in nature. As at September 30, 2020, the total value of non-current assets associated with United States operations is \$1,134,835 (September 30, 2019 - \$956,473), including exploration and evaluation asset advances and deposits of \$4,357 (September 30, 2019 - \$4,357), exploration and evaluation assets of \$1,103,483 (September 30, 2019 - \$951,356) and equipment and software of \$26,994 (September 30, 2019 - \$Nil). All remaining non-current assets are associated with Canadian operations.

21. Capital

The Company's objective when managing capital is to continue as a going concern so that it can provide value to shareholders by acquiring and conducting exploration on mineral exploration properties with the ultimate objective of finding commercial quantities of base and/or precious metals. Refer to Note 1 "Nature and continuance of operations". Capital is defined as share capital, reserves and deficit. The Company has traditionally been financed through equity issues rather than debt and does not anticipate using debt to finance its continuing grass roots exploration. Should the Company evolve to the point where it is developing or operating a mine, debt options may be investigated.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

21. Capital (continued)

The Company will raise equity as cash flow requirements dictate and will attempt, when able, to time financings with more favorable market conditions. The Company can scale back exploration, and to a certain extent, discretionary administrative costs during tighter equity markets. The Company invests capital that is surplus to its immediate operational needs in short-term, liquid and highly-rated financial instruments such as Bankers' Acceptances and Term Deposits.

The externally imposed capital requirement to which the Company can be exposed relates to flow-through shares. When the Company enters into flow-through agreements with flow-through share subscribers, the Company commits to use the full proceeds of these issuances to incur qualifying mineral exploration expenditures within a prescribed time frame. Should the Company not incur these expenditures, they are required to pay the flow-through subscribers an amount equal to the tax payable by the subscriber as a result of the Company's failure to incur the expenditures. At September 30, 2020 and September 30, 2019, there were no qualifying expenditures required pursuant to flow-through agreements; consequently there was no restricted cash at September 30, 2020 and September 30, 2019.

22. Financial risk management

a) Credit risk

Credit risk is the risk of financial loss to the Company if counterparties to a financial instrument fail to meet their contractual obligations. The Company's financial instruments that could be subject to credit risk consist of accounts receivable (excluding sales tax). The Company has had a history of prompt receipt of their receivables and considers credit risk to be low on these instruments as at September 30, 2020 and September 30, 2019. The Company's cash at bank is currently held at one financial institution.

b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they are due. The Company's approach to managing liquidity risk is the utilization of budgets, to attempt to maintain sufficient liquidity in order to meet operational and exploration requirements as well as property acquisition commitments. The Company raises capital through equity issues and its ability to do so is dependent on a number of factors including market acceptance, stock price and exploration results. The Company is continually investigating financing options. The continuing operations of the Company are dependent upon its ability to continue to obtain adequate financing or to commence profitable operations in the future. Operating expenses beyond June 30, 2021, increases in expenditures over budget for the nine months ended June 30, 2021, exploration programs and new property acquisitions will require additional financing. There can be no assurance that the Company will be successful in obtaining financing (refer to Note 1 - "Nature and continuance of operations").

The Company's significant remaining contractual maturities for financial liabilities as at September 30, 2020 and 2019 are as follows:

Accounts payable and accrued liabilities are due within one year.

c) Market risk

The Company may receive equity investments from time to time for the sale of mineral properties and these investments are subject to market price risk. The Company does not invest excess cash in equity investments as a general rule. Investment in common shares is recorded at fair value at the respective period ends with the resultant gains or losses recorded in earnings. The price or value of these investments can vary from period to period.

Notes to the Consolidated Financial Statements

(Expressed in Canadian Dollars) For the year ended September 30, 2020

22. Financial risk management (continued)

d) Interest rate risk

The Company has no debt facilities and has minimal amounts of interest income. Consequently, the Company is not exposed to significant interest rate risk at this time.

e) Foreign exchange risk

The Company undertakes transactions denominated in US currency through its exploration in the US; consequently it is exposed to exchange rate fluctuations. Refer to Note 12 – "Financial instruments" for the foreign exchange risk associated with the foreign denominated cash balances held, as well as accounts payable that must be settled in US\$ at September 30, 2020 and September 30, 2019.

23. Contingent liability

On October 24, 2019, Jadex Corporation was officially served documents naming Jadex, Jade Leader Corp., and Jean-Pierre Jutras as defendants in a lawsuit brought on by the plaintiff, a prospector, who seeks to claim ownership of some of the Jade samples collected during the 2019 trenching program in Wyoming. According to the plaintiff's lawsuit, the amount of damages exceeds US\$75,000, exclusive of interests and costs.

The Company believes that it has all records necessary to demonstrate that the samples came from the trenching program which they further believe confirms that they were obtained from the lode claims. Therefore, it is the Company's position that this action is without support in fact and without merit. Regardless, the outcome of any legal action can be contrary to what the Company expects and may result in the requirement for the Company to pay compensation to the plaintiff. At this time the Company has no way to estimate what, if any future liability it might have relating to this legal action.

24. Novel coronavirus pandemic

In early January 2020, a human infection originating in China was traced to a novel strain of coronavirus. The virus has subsequently spread to other parts of the world, including North America and Europe, and has caused unprecedented disruptions in the global economy as efforts to contain the spread of the virus have intensified. On March 11, 2020, the World Health Organization declared this outbreak of coronavirus ("COVID-19") as a pandemic and it continues to spread throughout North America. The full extent and duration of the impact of COVID-19 on the Company's operations and financial performance is currently unknown, and depends on future developments that are uncertain and unpredictable, including the duration and spread of the pandemic, its impact on capital and financial markets on a macro-scale and any new information that may emerge concerning the severity of the virus, its spread to other regions and the actions to contain the virus or treat its impact, among others. The Company was able to conduct its planned exploration programs for the summer of 2020, on its properties held in the United States (refer to Note 7 -"Exploration and evaluation assets"), as previously imposed travel restrictions as a result of COVID-19 were lifted July 1, 2020. There are no current COVID related work travel-related restrictions, though this may change. Nevertheless, there are currently no plans to return to the US properties until further financing is arranged. As the Company is an exploration stage company with no revenue sources, there is no impact on revenue from the Corona Virus restrictions. The effect of the virus on the economy as a whole and the amount of discretionary income available to spend on Jade may have an impact on commodity prices, however the Company is not in a position to be producing and selling Jade on a commercial scale at this time.

JADE LEADER CORP. MANAGEMENT'S DISCUSSION AND ANALYSIS YEAR ENDED SEPTEMBER 30, 2020

The following management discussion and analysis (MD&A) is management's assessment of the results and financial condition of Jade Leader Corp., ("Jade Leader" or "the Company), for the year ended September 30, 2020. The information included in this MD&A, with an effective date of December 17, 2020 should be read in conjunction with the consolidated financial statements as at and for the year ended September 30, 2020 and related notes thereto. Jade Leader's common shares trade on the TSX Venture Exchange under the symbol "JADE". The Company's most recent filings are available on the System for Electronic Document Analysis and Retrieval ("SEDAR") and can be accessed at www.sedar.com.

The Company's financial statements for the year ended September 30, 2020 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as at and for the year ended September 30, 2020. The Company has consistently applied the same accounting policies throughout all periods presented. The Company's accounting policies are provided in Note 3, "Summary of significant accounting policies," to the notes to the annual consolidated financial statements as at September 30, 2020.

The "Independent Qualified Person under the guidelines of National Instrument 43-101 of the Canadian Securities Administrators ("NI 43-101") for Jade Leader's exploration projects in the following discussion and analysis is Mr. Jean Pierre Jutras, B. Sc., Geol., P. Geol., a Registered Professional Geologist of Alberta and the President and Director of Jade Leader.

Statements and/or financial forecasts that are unaudited and not historical, including without limitation, exploration budgets, data regarding potential mineralization, exploration results and future plans and objectives, are to be regarded as forward-looking statements that are subject to risks and uncertainties that can cause actual results to differ materially from those anticipated. Such risks and uncertainties include risks related to the Company's business including, but not limited to: general market and economic conditions, continued industry and public acceptance, regulatory compliance, potential liability claims, additional capital requirements and uncertainty of obtaining additional financing and dependence on key personnel. Actual exploration and administrative expenditures can differ from budget due to unforeseen circumstances, changes in the market place that will cause suppliers' prices to change, and additional findings that will dictate that the exploration plan be altered to result in more or less work than was originally planned.

All forward-looking information is stated as of the effective date of this document, and is subject to change after this date. There can be no assurance that forward-looking information will prove to be accurate and future events and actual results could differ materially from those anticipated.

1) Principal Business of the Company

The Company is engaged exclusively in the business of mineral exploration and development and, as the Company has no mining operations, is considered to be in the exploration stage. The Company's philosophy is to acquire projects at the grass roots level and advance them to a point where partners can be brought in to further the properties to the stage where a mine is commercially feasible or the property can be sold outright.

The recoverability of the amounts comprising mineral properties is dependent upon the existence of economically recoverable mineral reserves; the acquisition and maintenance of appropriate permits, licenses and rights; the ability of the Company to obtain financing to complete the development of the properties where necessary and upon future profitable production; or, alternatively, upon the Company's ability to recover its costs through a disposition of its interests. The Company has no operating income and no earnings; exploration and operating activities are financed by the sale of common shares and warrants. None of the Company's properties are in production. Consequently, the Company's net income is a limiting indicator of its performance and potential.

2) Highlights - Year ended September 30, 2020

a) Mineral Properties

The Company completed its fall 2019 exploration field program in October 2019 on the Wyoming Jade Fields property in Wyoming, USA, including staking 10 additional claims, and completing the reclamation required by the authorities for its trenching program. The Company has continued to compile and evaluate the results of its exploration activities during fiscal 2019 and 2020. During Q3 2020, the Company procured financing allowing the Company to complete a three-week field program in the Wyoming Jade Fields beginning July 1, 2020. The program, evaluation of which is currently ongoing, included additional prospecting as well as stone testing for assessing quality and marketability of samples collected to date.

b) Corporate

During and following the three and twelve month periods ended, September 30, 2020, the Company has continued to focus on Jade testing and evaluation from multiple properties and on promotional activities to expand opportunities for financing its planned mineral property exploration programs and to build a market for future jade sales when saleable product is available.

During the year ended September 30, 2020, the Company closed a non-brokered private placement share and warrant issue for aggregate gross proceeds of \$450,000 (refer to Section 7) "Financing" for more information). The proceeds are being used for working capital to fund exploration of its US mineral properties, general administration and operations and stone testing of the materials collected to date from its US mineral properties.

During the current fiscal year, the Company appointed Mr. Andrew Shaw as an advisor. Mr. Shaw is exceptionally knowledgeable about the Jade community in China and abroad and is a master carver himself. In Mr. Shaw's advisory capacity, he will be eligible for a commission on future sales of material to third parties who have been introduced to the Company by Mr. Shaw during the term of the Advisory Agreement.

In January 2020, two of the Company's executives travelled to Vancouver, BC to attend the Global Chinese Financial Forum ("GCFF") and the Association for Mineral Exploration ("AME") Roundup which are held annually in Vancouver. The purpose of attending these two events was to showcase the Company's jade samples collected from its US mineral properties, to gain greater exposure to the investing community. The GCFF provides a greater audience of Chinese investors looking for investment opportunities in Canada.

The Company's President, Jean-Pierre Jutras, was invited to participate in the American Gem Trade Association ("AGTA") Gem Fair Tucson 2020 seminar series; one of the largest assemblies of the colored gemstone industry in the world. The focus of Mr. Jutras's presentation at this February 2020 seminar was Jade, emphasizing Jade geology in the United States including a view of Jade Leader's US exploration activities, to familiarize the audience with what the United States' future potential as a producer in the Jade space might be.

3) Mineral Properties

Transactions for the year ended September 30, 2020 are summarized in Note 7 "Exploration and evaluation assets" to the Audited Consolidated Financial Statements for the year ended September 30, 2020, which accompany this MD&A.

DJ Jade Project, Washington State, USA

On August 28, 2017, the Company announced its acquisition of the DJ Jade project, in Washington State, USA, through a combination of Option Agreement and staking. The gross costs and impairments recorded to the DJ Jade project at September 30, 2020 are \$552,133 and \$Nil, respectively (September 30, 2019 - \$547,168 and \$Nil, respectively).

JADE LEADER CORP. MANAGEMENT'S DISCUSSION AND ANALYSIS YEAR ENDED SEPTEMBER 30, 2020

The property, consisting of 18 existing and recently filed Lode Claims covers an area of slightly more than 140 hectares, with 3 historical and numerous newly identified nephrite jade occurrences. The Company has earned 100% of the mineral rights associated with those claims, subject to a 2% Net Smelter Royalty ("NSR"). Additional claims staked around the initial optioned claims fall within an area of mutual interest and are considered part of the original Option Agreement.

In addition, the Company has the option to purchase one half, (1%), of the NSR for the sum of US\$500,000 in cash or equivalent value in Common shares of the Company. The Optionor also granted, the Company the right, upon written notice, to acquire the remaining half, (1%), of the NSR for the sum of US\$1,000,000 in cash or equivalent value of Common Shares of the Company, thereby extinguishing the NSR of the Optionor.

On July 20, 2017, the Company entered into an Assignment and Novation Agreement, with Jadex (the Company's wholly-owned subsidiary). Jadex agreed that it shall be bound by, observe and perform the duties and obligations of the Company, for the assigned interests.

The Company conducted a first pass drill program in November 2018. This program was followed up in the spring of 2019 and included an airborne geophysical survey, followed by detailed mapping and sampling of previously identified in-situ jade occurrences. A further exploration program was conducted in July and August 2019 which involved hand trenching and sampling. The program confirmed a new in-situ surface nephrite jade occurrence, the widest found on the property to date. In addition to its jade exploration work, the Company has encountered large masses of Rhodonite, a light grey to pink to yellow semi-precious gemstone with significant commercial demand.

The Company is currently evaluating chatoyant materials collected during previous exploration programs with the view to test for market acceptance of these samples.

Wyoming Jade Fields, Wyoming, USA

The Company has acquired, by staking 89 Mineral Lode Claims covering in excess of 1,800 acres. The claims cover 5 contiguous blocks in areas where field work found geology favourable for jade formation. This includes abundant nephrite jade float, sub-crop and in-situ jade occurrences as well as numerous small-scale historical production pits. All of the new ground is on public lands administered by the Bureau of Land Management ("BLM"). None of these historically productive jade-bearing areas have been previously evaluated using modern day jade-genesis concepts or exploration technologies. On July 15, 2018, Jadex entered into an Option Agreement to acquire a 100% interest in an existing Lode Claim (20.7 acres). The acquisition of the 100% interest, subject to a 2% NSR, was completed during fiscal 2019 with the Company having made a total of US\$35,000 in property payments and having incurred exploration costs of US\$60,000 in accordance with, and subject to the timelines outlined, in the Option Agreement.

The Company may elect, upon written notice, to acquire one half, (1%), of the NSR for US\$20,000 in cash. The Optionor also granted the Company the right, upon written notice, to acquire the remaining half, (1%), of the NSR for US\$30,000 in cash, thereby extinguishing the NSR of the Optionor.

The Company conducted its spring 2019 exploration program, consisting of an airborne geophysical survey, followed by prospecting, detailed mapping, sampling of previously identified in-situ Jade occurrences, and mechanized trenching. The field program, which was completed during June 2019, was conducted to review the airborne geophysical data, conduct additional prospecting and outline the first mechanized trenching targets for further follow up. The field program resulted in additional nephrite jade discoveries at surface and led the Company to stake an additional 25 lode claims (209 hectares/516.5 acres), increasing the size of its current 4 claim blocks, and adding an entirely new block of claims to cover a new target. After receiving the required permitting, the Company completed a further exploration program involving mechanized trenching and sampling, during September and October 2019. Field evaluation of jade obtained from these trenches includes a full range of potential qualities from basic ornamental stones to carving and jewellery grade material. 282 individual jade samples (over 23.45 tonnes) were recovered from bedrock with heavy equipment and will be evaluated for their textures, colours and carveability. Additionally, the field program included extensive alteration mapping and reconnaissance sampling along the geophysically well-defined alteration

zones associated with jade formation identified in the spring program. More details can be found in Highlights, 2 b) of the Management Discussion and Analysis for the year ended September 30, 2019.

During July 2020, the Company conducted a three week field program which included stone testing for assessing quality and marketability of samples collected to date as well as prospecting. Evaluation of this program is on-going as of the date of this report. The summer 2020 program included testing 38 samples of the 52 samples recovered from trench T1C in September 2019 as these samples were thought to be representative of the breccia-hosted Jades of the T1 target area. 95% by weight of the samples tested passed the testing and workability evaluation. Thin slices of T1 target Jade collected south and west of trench T1C during the program were also cut to evaluate the stone's suitability as ornamental or architectural stone. The stone testing to date has been encouraging; consequently, the Company has commenced a product development program based on this material to generate marketable finished product examples for test marketing in local and international markets.

An additional target northwest of the T1 target, called the Sky Zone, was also hand sampled and generated over 110 pounds (49.9 Kg) of fine grained, texturally uniform, medium green jades being cleaned, tested and prepared for marketing to the jewellery market. This zone has been recognized at surface over some 15 meters of strike length, with nephrite jade occurring both within a sheared intrusive contact, and extending into host country rock. The zone remains open in all directions at this time.

The gross costs and impairments recorded for the Wyoming Jade Fields project at September 30, 2020 are \$551,350 and \$Nil, respectively (September 30, 2019 - \$404,188 and \$Nil respectively).

Tell, Yukon

The Company acquired 100% of the Tell mineral property through staking. The Company holds 193 claims covering slightly in excess of 4,000 hectares located approximately 140 kilometres east of Mayo, Yukon. The data collected during the 2014 and 2015 short program continues to support that mineralization at Tell is sediment-hosted and potentially related to an extensive exhalative event within a sedimentary sequence with evidence of minor volcanic components, such as expected within the SEDEX/VMS environment. The 2015 surface data also confirms that mineralization may be related to an extensive metal rich unit within a sequence documented over 3 kilometres of strike length to date. These results are geologically strong and support further exploration if funding can be arranged.

Given the renewed interest in the Rackla belt hosting the Tell property, subsequent to significant silver, lead and zinc discoveries regionally by Cantex Mine Development Corp, the Company conducted a one week fly in program of geological mapping and soil sampling during July 2019. The program provided all of the required expenditures to submit a certificate of work necessary to renew 187 of the existing claims constituting the Tell property for an additional year. The Yukon Government, due to COVID 19 measures and travel restrictions this year, has granted all claim and land use permit holders a free, no action required, one year extension to any active claims. The Tell property now consists of 193 contiguous claims, which have been extended to October 2021. The Company will continue to investigate opportunities to option out its Tell property in order to expand exploration on the project without additional financing being required. The gross costs and impairments recorded to the Tell project at September 30, 2020 are \$452,167 and \$Nil, respectively (September 30, 2019 - \$449,832 and \$Nil, respectively).

4) Operating Results

A summarized statement of operations appears below to assist in the discussion that follows:

	 Three months ended September 30			_	Year ended September 30		
	 2020	_	2019		2020	. <u> </u>	2019
General and administrative expenses	\$ (44,742)	\$	(263,611)	\$	(290,872)	\$	(529,460)
Reporting to shareholders	-		-		(2,881)		(15,384)
Professional fees	(28,578)		(27,888)		(111,026)		(38,195)
Stock exchange and transfer agent fees	(2,523)		(2,456)		(10,016)		(10,425)
Depreciation	(1,099)		(113)		(3,759)		(453)
Impairment	-		(17,654)		-		(17,654)
Sublease revenue	4,257		4,698		18,348		18,789
Interest and other	(2,552)		2,979		(643)		4,360
Net and comprehensive loss	\$ (75,237)	\$	(304,045)	\$	(400,849)	\$	(588,422)

The most significant variances in results are discussed below.

- Variances relating to general and administrative expenses are addressed below in more detail.
- Reporting to shareholder costs include the dissemination of the annual audited financial statements for the year ended September 30, 2019 and 2018 as well as the 2019 Annual General Meeting ("AGM"). The variance of \$12,500 between the current year and the comparative year is primarily due to the timing of the Annual General Meeting ("AGM"). The 2019 AGM was held during Q3 2019, while the 2020 AGM is scheduled for December 2020 (Q1 2021).
- Professional fees which consist of auditing fees, legal and other filing fees have increased by \$700 and \$72,800 in the current three and twelve month periods respectively from the comparative periods. This increase is primarily the result of legal fees incurred during the current year regarding the legal dispute discussed in Section 15 "Legal dispute" below. For the year ended September 30, 2020, fees incurred include legal fees related to the lawsuit of \$78,200 (2019 \$Nil), miscellaneous legal fees of \$3,500 (2019 \$2,400) audit fees of \$19,200 (2019 \$24,800), tax preparation and legal fees on account of Jadex of \$5,100 (2019 \$7,100) and filing fees of \$4,900 (2019 \$3,900). The decrease in audit fees is a result of an over accrual of 2019 fees as well as a reduction in 2020 fees.
- Stock exchange and transfer agent fees relate directly to the number of security exchange transactions during the periods, for which there is no significant change between the current three and twelve month periods and the comparative three and twelve month periods.
- The increase in depreciation expense from the comparative period is primarily a result of equipment purchases of \$30,362 in Jadex Corporation with corresponding depreciation being recorded. These acquisitions include storage containers for secure storage of Jade samples collected during recent field exploration programs in addition to other equipment.
- The impairment recorded in Q4 of fiscal 2019 related to the Keithly Mountain property, as the Company determined that it would no longer continue to explore that property; consequently impairing the full amount of expenditures incurred. There were no impairments in the current year.
- Interest and other revenue is down by \$5,500 and \$5,000 in the three and twelve month periods ending September 30, 2020 respectively, from the comparative three and twelve month periods. During Q2 and Q3 2020, interest earned on the high-interest savings account was nominal as the Company's treasury was limited. Further, during Q4 2020, the Company recognized a foreign exchange loss of \$2,600 on its US\$ denominated current account held on account of Jadex. There was no similar foreign exchange loss in the comparative periods.

The following summarizes the major expense categories comprising general and administrative expenses for the respective periods:

	Three months ended September 30				Year ended	l Sep	ptember 30	
	2020		2019		2020		2019	
Administrative consulting fees	\$ 9,396	\$	14,178	\$	90,156	\$	72,807	
Occupancy costs	10,578		13,886		52,236		55,362	
Office, secretarial and supplies	8,603		11,888		40,269		60,012	
Travel and promotion	9,446		10,293		30,477		85,481	
Insurance	4,331		3,577		16,513		14,091	
Computer network and website								
maintenance	544		1,803		2,620		4,576	
Stock-based compensation	-		202,581		50,980		224,519	
Salaries and benefits	-		3,835		-		5,513	
Miscellaneous	1,844		1,570		7,621		7,099	
Total	\$ 44,742	\$	263,611	\$	290,872	\$	529,460	

- Administrative consulting fees, which consist of fees for the contract controller, CFO and President are down by \$4,800 and up by \$17,350 from the three and twelve month comparative periods respectively. Fiscal 2020 fees include fees of \$59,800 (2019 \$41,700) to the president, \$21,000 (2019 \$19,250) to the contract controller, \$7,000 (2019 \$10,200) to the CFO and \$2,300 (2019 \$1,600) to other consultants. The 2020 three month period fees include fees of \$4,400 (2019 \$8,000) to the president, \$3,750 (2019 \$3,500) to the contract controller, \$1,260 (2019 \$2,700) to the CFO. The increase is primarily due to additional time required by, and consequently fees charged by, the President pertaining to the Legal Dispute discussed in Section 15) "Legal dispute" in this document.
- Occupancy costs are down by \$3,100 for the year ended September 30, 2020, (\$3,300) for the three month period ended September 30, 2020. On August 1, 2020, the Company entered into a new lease agreement, terminating August 31, 2021. As a result of the new leasing arrangement, the Company has incurred lower occupancy costs during the three month period ended September 30, 2020. For further information relating to obligations for Occupancy costs refer to Section 6) "Commitments" of this document.
- Office and secretarial fees, which primarily relate to contract administrative services and office supplies, are down by \$3,300 and \$19,700 during the three and twelve month periods ended September 30, 2020 respectively. The decrease is consistent with a decrease in activity during fiscal 2020 that took place due to COVID 19 (refer to Section 22) "Novel Corona Virus pandemic) and a conscious effort to reduce costs before the financing took place during Q3 2020.
- Travel and promotion expenditures have decreased by \$800 and \$55,000 from the three and twelve month comparative periods respectively. One of the contributing factors was the expenditures incurred in the comparative periods for services provided by an on-line investing news agency for the purpose of company promotion and lead generation with no comparable expenditures being incurred in the current period. During the year ended September 30, 2020, travel and promotion expenditures included expenses related to the AMEBC Roundup held annually in Vancouver, as well as registration fees and related travel expenses for two of the Company's executives to attend and exhibit the samples of the Company's Jade collections at the Global Chinese Financial Forum ("GCFF") also held in Vancouver. The purpose of attending the GCFF was to show case the Company's Jade samples collected from its mineral properties in the United States to a greater audience of Chinese investors looking for investment opportunities in Canada. In addition the Company's President, Jean Pierre Jutras, was invited to participate in the American Gem Trade Association ("AGTA") GemFair Tucson 2020 seminar series; one of the largest assemblies of the colored gemstone industry in the world. The focus of Mr. Jutras's presentation at this February 2020 seminar was Jade, emphasizing Jade geology in the United States including a view of Jade Leader's US exploration activities, to familiarize the audience with what the United States' future potential as a producer in the Jade space might be. Q4 2020 expenditures also include materials, supplies and labour for the preparation of Jade samples for evaluation and marketing purposes. During the three month period ended June 30, 2019, two of the Company's executives and five of the Company's consultants, travelled to the 2019 Zi Gang Cup Jade and Stone Works Competition and Exhibition, held in Suzhou, Jiangsu province, China. The competition, which brings together some of the world's most recognized Chinese and International

Jade carvers and Jade industry leaders, provided an excellent opportunity to formally introduce Jade Leader, it's projects and progress to a wider dedicated audience in the Jade space. The Company used this opportunity to conduct additional market research allowing it to more effectively direct its planned exploration programs at high priority targets. Other travel and promotion expenditures during the year ended September 30, 2019, included travel to Tucson, Arizona to attend various gem and mineral shows for the purpose of networking and marketing, and attending the AMEBC Roundup held annually in Vancouver, British Columbia.

- Insurance expenses are up year over year by \$2,400 in the year ended September 30, 2020 reflecting an increase in insurance rates that occurred upon renewal of insurance policies in Q3 2020 and Q4 2020. There has been no significant change in insurance coverage since Q4 2017, with the exception of short-term coverage required for heavy equipment rentals utilized to complete the fall 2019 exploration program conducted in the Wyoming Jade Fields.
- Computer network and website maintenance expenditures, which include internet service, website hosting and other information system expenditures, have decreased by \$1,300 during the three month period ended September 30, 2020 and decreased overall by \$1,900 during the year ended September 30, 2020. Q4 2019 expenditures included consulting costs related to network maintenance and security, of which there were no similar expenditures in the current period.
- During Q1 2020, the Company issued 275,000 options to consultants valued at \$50,980. There were no other options issued during the remainder of the year ended September 30, 2020. During the year ended September 30, 2019, the Company issued 1,355,000 stock options to its Officers, Directors and Consultants valued at \$224,519.
- Salaries and benefits expense incurred in Q3 and Q4 2019 relates to the Company's share of CPP remitted for the exercise of 280,000 options for proceeds of \$28,000, and 515,000 options for proceeds of \$51,500, respectively. There were no similar transactions during the year ended September 30, 2020.

5) Liquidity and Capital Resources

As of September 30, 2020, the Company had a working capital balance of \$257,716 (September 30, 2019 – \$349,921), a decrease of \$92,205. Changes to working capital in the current and comparative periods are discussed below:

- Operating activities during the year ended September 30, 2020 resulted in a cash outflow of \$334,341 (2019 \$439,714). Cash paid to suppliers and contractors is down by \$100,900 and reflects changes in both activity levels during the year as discussed above in 4) "Operating results", as well as the changes in accounts receivable, prepaid expenses and accounts payable. Due to limited available cash at the end of the 2018 fiscal year, accounts payable increased dramatically. These payables were paid when the Company received a cash injection from the financings that occurred in Q1 2019. Further, during Q1 2019, the Company advanced \$36,000 to an on-line investing news agency for the purpose of company promotion and lead generation. The advance covered one year of services.
- Interest and other revenue is down by \$5,500 and \$5,000 in the three and twelve month periods ending September 30, 2020 respectively, from the comparative three and twelve month periods. During Q2 and Q3 2020, interest earned on the high-interest savings account was nominal as the Company held lower cash balances in that account during the year. As well, during Q4 2020, the Company recognized a foreign exchange loss of \$2,600 on its US\$ denominated current account held on account of Jadex. There was no similar foreign exchange loss in the comparative periods
- The Company expended \$208,500 on exploration and evaluation assets during the current year compared to \$689,800 in the comparative year. Expenditures in the current period and comparative periods primarily related to the Company's jade properties, in Wyoming and Washington State.
- During the three-month period ended September 30, 2020, the Company expended \$600 on equipment purchases for field exploration programs. During the year ended September 30, 2020 the Company's expenditures totaled \$30,991 and include the acquisition of storage containers for secure storage of Jade samples collected during recent field exploration programs and computer equipment. There were no similar expenditures in the comparative period.
- During the three-month period ended June 30, 2020, the Company closed a private placement financing for aggregate gross proceeds of \$450,000, (net \$439,358 after share issue costs). Refer to

Note 11 - "Share capital, stock options and warrants" of the Audited Consolidated Financial Statements which accompany this document and section 7) "Financing" for further information.

- During the year ended September 30, 2019, the Company closed a private placement of shares and warrants for proceeds of \$1,148,954, (net \$1,104,214 after share issuance costs). See Section 7) "Financing" below for more information.
- During the year ended September 30, 2019, 3,250,000 warrants were exercised for gross aggregate proceeds of \$325,000. Refer to Note 11 "Share capital, stock options and warrants" of the Audited Consolidated Financial Statements which accompany this document and section 7) "Financing" for further information. There were no similar transactions during the year ended September 30, 2020.
- During the year ended September 30, 2019, 795,000 options were exercised for total proceeds of \$79,500. See Section 7) "Financing" for more information related to these transactions. There were no similar transactions during the year ended September 30, 2020.

The Company believes that it has sufficient working capital to finance general and administrative and other operating expenses for the next nine month period. Operating expenses beyond June 2021, increases in expenditures over budget for the nine months ended June 30, 2021, future exploration programs and new property acquisitions, will require additional financing, or possibly be positively influenced by materials sales. There can be no assurance that management will be successful in obtaining financing, or that material sales will occur during the period. Refer to Note 1 - "Nature and continuance of operations" to the Audited Consolidated Financial Statements which accompany this document. With limited capital resources the Company will prioritize non-discretionary operating costs, will cut back discretionary operating costs and will defer exploration programs until suitable financing can be procured.

6) Commitments

On August 1, 2020, the Company entered into a new leasing arrangement for office space, terminating August 31, 2021. Pursuant to the agreement, the Company is committed to pay base lease costs plus additional rent, which includes its proportionate share of costs incurred in the operation, maintenance, management and supervision of the property as defined by the landlord's current lease for the premises. Additionally, Jade Leader entered into a sublease agreement with CANEX Metals terminating August 31, 2021.

As at September 30, 2020, the committed lease costs to the termination of the lease are as follows:

	October 1, 2020 to August 31, 2021
	\$
Base lease cost	9,708
Expected additional rents	27,876
Total expected lease commitment	37,584
Expected sublease revenue	17,226
Net future rent	20,358

7) Financing

2020

On June 17, 2020, the Company closed a non-brokered private placement share and warrant issue for 9,000,000 common units at \$0.05 per unit comprised of 9,000,000 common shares and 4,500,000 common share purchase warrants for gross aggregate proceeds of \$450,000. Each common unit was comprised of one common share and one half of one common share purchase warrant. Each common share purchase warrant entitles the holder to purchase one additional common share at a price of \$0.10 per share until June 17, 2022. In valuing the warrants, the Company applied a proration of proceeds method to the components incorporating the Black-Scholes Pricing model assuming a volatility of 70.10%, a risk free rate of 0.29%, a 2 year warrant life

and a 0% dividend rate. In connection with this financing, the Company paid finder's fees of \$2,000 which have been included in the share issuance costs that are deducted from the proceeds of the financing that are credited to the Common Share Capital. Related parties, comprised of officers and directors, acquired 1,260,000 of the total units.

2019

On October 12, 2018, the Company closed the first tranche of the private placement share and warrant issue for 3,865,816 common units at \$0.25 per unit comprised of 3,865,816 common shares and 3,865,816 common share purchase warrants for gross aggregate proceeds of \$966,454. Each common unit was comprised of one common share and one common share purchase warrant. Each common share purchase warrant entitles the holder to purchase one additional common share at a price of \$0.40 per share until October 12, 2020. In valuing the warrants, the Company applied a proration of proceeds method to the components incorporating the Black-Scholes Pricing model assuming a volatility of 135.80%, a risk free rate of 2.27%, a 2 year warrant life and a 0% dividend rate. In connection with this financing, the Company paid finder's fees of \$27,700 which are included in the share issuance costs that are deducted from the proceeds of the financing that are credited to Common Share Capital. Subsequent to September 30, 2020, the warrant expiry was extended to October 12, 2021 and the warrant exercise price was amended to \$0.21 per share from \$0.40 per share.

On October 23, 2018, the Company closed the second tranche of the private placement share and warrant issue for 730,000 common units at \$0.25 per unit comprised of 730,000 common shares and 730,000 common share purchase warrants for gross aggregate proceeds of \$182,500. Each common unit was comprised of one common share and one common share purchase warrant. Each common share purchase warrant entitles the holder to purchase one additional common share at a price of \$0.40 per share until October 23, 2020. In valuing the warrants, the Company applied a proration of proceeds method to the components incorporating the Black-Scholes Pricing model assuming a volatility of 135.38%, a risk free rate of 2.27%, a 2 year warrant life and a 0% dividend rate. In connection with this financing, the Company paid finder's fees of \$1,250 which are included in the share issuance costs that are deducted from the proceeds of the financing that are credited to Common Share Capital. Subsequent to September 30, 2020, the warrant expiry was extended to October 23, 2021 and the warrant exercise price was amended to \$0.21 per share from \$0.40 per share.

During February 2019, 250,000 warrants exercisable at \$0.10 per share, expiring April 17, 2019 were exercised for total proceeds of \$25,000.

During March 2019, 2,950,000 warrants exercisable at \$0.10 per share, expiring March 24, 2019 were exercised for total proceeds of \$295,000 and 50,000 warrants exercisable at \$0.10 per share, expiring April 17, 2019 were exercised for total proceeds of \$5,000.

During June 2019, 280,000 options exercisable at \$0.10 per share, expiring July 10, 2019 were exercised for total proceeds of \$28,000.

During July 2019, 515,000 options exercisable at \$0.10 per share, expiring July 10, 2019 were exercised for total proceeds of \$51,500.

8) Exploration Expenditures

Refer to Note 7 "Exploration and evaluation assets" to the Consolidated Financial Statements for the year ended September 30, 2020.

9) Selected Annual financial Information

The following selected financial data has been extracted from the Consolidated Financial Statements, for the fiscal years ended September 30, 2020, 2019 and 2018 and should be read in conjunction with those Consolidated Financial Statements.

For the years ended or as at September 30	2020	2019	2018	
Financial Results	\$	\$	\$	
Sublease revenue	18,348	18,789	18,527	
Interest and other income	(643)	4,360	331	
Net loss and comprehensive loss for the year	(400,849)	(588,422)	(705,457)	
Basic and diluted loss per share	(0.01)	(0.01)	(0.02)	
Financial Position				
Working capital (deficiency)	257,716	349,921	(74,058)	
Total assets	1,888,643	1,844,987	741,934	
Capital stock	14,234,128	13,907,792	12,854,098	
Reserves	3,274,526	3,110,524	2,430,985	
Deficit	(15,674,670)	(15,273,821)	(14,685,399)	

Net and comprehensive loss for 2020 includes a non-cash charge for share-based payment transactions of \$50,980 (2019 - \$224,519, 2018 - \$361,813), which accounts for the bulk of the variations in net loss and comprehensive loss from year-to-year.

10) Selected Quarterly Financial Information

The following selected financial data has been extracted from the unaudited interim financial statements for the fiscal periods indicated and should be read in conjunction with those unaudited financial statements.

	Sep 30,	Jun 30	Mar 31	Dec 31	Sep 30	Jun 30	Mar 31	Dec 31
	2020	2020	2020	2019	2019	2019	2019	2018
Three months ended:	(Q4 2020)	(Q3 2020)	(Q2 2020)	(Q1 2020)	(Q4 2019)	(Q3 2019)	(Q2 2019)	(Q1 2019)
	\$	\$	\$	\$	\$	\$	\$	\$
Loss before impairment of								
exploration and evaluation								
assets and other items	(76,942)	(46,189)	(128,074)	(167,349)	(294,068)	(114,740)	(102,128)	(82,981)
Impairment	1	-	ı	-	(17,654)	ı	1	-

Net and comprehensive loss	(75,237)	(41,379)	(123,039)	(161,194)	(304,045)	(108,939)	(97,448)	(77,990)
Basic and diluted loss per								
share	0.00	0.00	0.00	0.00	(0.01)	0.00	0.00	0.00

Quarterly net losses are influenced by many factors from period to period and are significantly affected by the amount of activity in the junior mining sector, the Company's working capital position, the potential exploration opportunities as well as timing of certain expenditures including the timing of the AGM. The rebound of the junior mining sector in the latter part of fiscal 2017 and the Company's new focus on Jade exploration allowed the Company to improve its working capital position through financing, thus allowing the Company to expand its operations into fiscal 2018, 2019 and Q1 2020. Additionally, Q1 2020, Q1 2019, Q3 2019 and Q4 2019 operations include stock-based compensation of \$50,980, \$11,438, \$10,500 and \$202,581 respectively which are non-cash charges that cause large fluctuations in earnings. During fiscal 2020, the Company's earnings have been impacted by legal expenditures of \$78,200 resulting from a legal dispute as outlined in Section 15) Legal dispute. The Company reduced discretionary expenditures and field programs during Q2 and Q3 2020 due to reduced cash balances and limitations put in place by the Novel Corona Virus Pandemic – see Section 22 below. Late in Q3 2020 the Company completed a private placement financing providing working capital for planned field programs and general administration and operations going forward.

Interest and other income include interest earned on the Company's high interest bank account and foreign exchange gains and losses incurred during those periods. Q4 2020 includes a foreign exchange loss of \$2.600.

11) Off-Balance Sheet Transactions

The Company has no off-balance sheet transactions to report.

12) Directors and Officers

Jean Pierre Jutras Director and President Barbara O'Neill Corporate Secretary

Shari Difley Chief Financial Officer Shane Ebert Director
Cornell McDowell Director Peter Megaw Director

13) Related Party Transactions

Transactions for the year ended September 30, 2020 are disclosed and explained in Note 17 "Related party balances and transactions and key management remuneration" to the Audited Consolidated Financial Statements for the year ended September 30, 2020 which accompany this MD&A.

14) Share capital, warrants, and stock options

Refer to Note 11 "Share capital, stock options and warrants" to the Consolidated Financial Statements for the year ended September 30, 2020 and the Statement of Changes in Equity for common share capital, stock option and warrant transactions during the year ended September 30, 2020 and balances as at that date.

On October 2, 2020, the Company extended the expiry dates for certain warrants by one year as follows; 1) 3,865,816 warrants expiring on October 12, 2020 will now expire on October 12, 2021 and 2) 730,000 warrants expiring October 23, 2020 will now expire on October 23, 2021. In addition, the exercise price was repriced from \$0.40 per share to \$0.21 per share at that time.

There were no other changes in share capital issued, warrants issued or expired or options expired, from September 30, 2020 to December 17, 2020, the date of this report.

15) Legal Dispute

On October 24, 2019, Jadex Corporation was served documents naming Jadex, Jade Leader Corp., and Jean-Pierre Jutras as defendants in a lawsuit initiated by the plaintiff, a prospector, who seeks to claim ownership of some of the Jade samples collected during the 2019 trenching program in Wyoming. According to the plaintiff's lawsuit, the amount of damages exceeds US\$75,000, exclusive of interests and costs. The action has been brought by the plaintiff based on his belief that the Company extracted samples that were part of the placer claims which he holds as opposed to the lode claims which the Company holds. The Company's legal counsel filed a motion to dismiss and a motion to stay.

On January 7, 2020, the Court held a hearing on the motion to dismiss and the motion to stay and on January 29, 2020, the motions were denied as the court believes that the characterization of the samples as either placer or lode, must be established before a decision can be made whether the matter can be moved to arbitration or whether the matter must be contested in the courts. A hearing for the preliminary injunction had been set for February 20, 2020; however, due to scheduling conflicts and subsequent travel restrictions due to COVID-19, the hearing was adjourned. As at September 30, 2020, pursuant to a petition made to the court by the opposing Counsel, the Company has agreed to retain samples from trench T1A until resolution of the legal dispute. The Plaintiff sought an injunction on materials held by the Company from trench T1C, which was denied. Next steps as currently scheduled include various filings leading to an evidentiary hearing in February 2021, and, should the matters proceed from there, to a potential trial date in June 2021.

The Company believes that it has all records necessary to demonstrate that the samples came from the trenching program which they further believe confirms that they were obtained from bedrock within its lode claims. Therefore, it is the Company's position that this action is without support in fact and without merit. Regardless, the outcome of any legal action can be contrary to what the Company expects and may result in the requirement for the Company to pay compensation to the plaintiff. The Company has no way to estimate what, if any future liability it might have relating to this legal action.

16) Financial Instruments

The carrying value of the Company's financial instruments, consisting of cash, accounts receivable (net of sales tax), short-term investments, and accounts payable and accrued liabilities (net of sales tax), approximate their fair value due to the short-term nature of the instruments. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest or credit risks arising from these financial instruments.

The Company undertakes transactions denominated in US currency through its exploration in the US; consequently, it is exposed to exchange rate fluctuations. The Company will acquire US funds from time to time to settle US\$ denominated liabilities. At September 30, 2020, the Company had US\$8,152 (CDN\$10,874) (September 30, 2019 – US\$3,359 (CDN\$4,759)) in a US denominated bank account. The effect of a foreign currency increase or decrease of 10% on this cash holding would result in an increase or decrease of CDN\$1,087 (September 30, 2019 – CDN\$476). Additionally, at September 30, 2020, accounts payable and accrued liabilities include liabilities of US\$8,071 (CDN\$10,766) (September 30, 2019 – US\$30,670 (CDN\$40,832)) that must be settled in US\$. The effect of a foreign currency increase or decrease of 10% on this liability would result in an increase or decrease of CDN\$1,077 (September 30, 2019 – CDN\$4,083) to the amount payable.

17) Financial Risk Management

a) Credit risk

Credit risk is the risk of financial loss to the Company if counterparties to a financial instrument fail to meet their contractual obligations. The Company's financial instruments that could be subject to credit risk consist of accounts receivable, (excluding sales tax). The Company has had a history of prompt receipt of their receivables and considers credit risk to be low on these instruments as at September 30, 2020 and September 30, 2019. The Company's cash and at bank is currently held with one financial institution.

b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they are due. The Company's approach to managing liquidity risk is the utilization of budgets, to attempt to maintain sufficient liquidity in order to meet operational and exploration requirements as well as property acquisition commitments. The Company raises capital through equity issues and its ability to do so is dependent on several factors including market acceptance, stock price and exploration results. The Company is continually investigating financing options. The continuing operations of the Company are dependent upon its ability to continue to obtain adequate financing or to commence profitable operations in the future. The Company believes that it has sufficient working capital to finance general and administrative and other operating expenses for the next nine-month period ended June 30, 2021. However, increases in expenditures above and beyond budgeted expenditures, including new property acquisitions and exploration programs will require additional financing. There can be no assurance that the Company will be successful in obtaining financing (refer to Note 1 - "Nature and continuation of operations" of the Unaudited Condensed Interim Consolidated Financial Statements which accompany this document).

c) Market risk

The Company may receive equity investments from time to time for the sale of mineral properties and these investments are subject to market price risk. The Company does not invest excess cash in equity investments as a general rule. Investment in common shares is recorded at fair value at the respective

period ends with the resultant gains or losses recorded in earnings. The price or value of these investments can vary from period to period.

d) Interest rate risk

The Company has no debt facilities and has minimal amounts of interest income; it is not exposed to significant interest rate risk at this time. All market risk is associated with the Company's investments in common shares, which are recorded at fair value at the respective period ends with the resultant gains or losses recorded in earnings.

e) Foreign exchange risk

The Company undertakes transactions denominated in US currency; consequently it is exposed to exchange rate fluctuations. The effect of a foreign currency increase or decrease of 10% on the US denominated cash balance and liabilities has been disclosed in Section 16) – "Financial instruments".

18) Outlook

- The Company completed its planned exploration programs for the summer of 2020 during July 2020 on the Wyoming Jade Fields properties (refer to Section 3 "Mineral properties"). The Company's working capital position was improved due to successfully completing a financing during Q3 2020. See section 7 "Financing" above.
- The July 2020 Wyoming Jade Fields exploration program, evaluation of which is currently ongoing, included stone testing for assessing quality and marketability of samples collected to date as well as prospecting. The stone testing to date has been encouraging; consequently, the Company has commenced a product development program based on this material to generate marketable finished product examples for test marketing in local and international markets. An additional target northwest of the T1 target, called the Sky Zone, was also hand sampled and generated over 110 pounds (49.9 Kg) of fine grained, texturally uniform, medium green jades being cleaned, tested and prepared for marketing to the jewellery market.

All Wyoming Jade Fields projects are still active, with permitting in place to continue trenching on the properties until September 2021, and can be renewed annually thereafter. The Company's immediate focus will be to continue to evaluate materials recovered and to test the market for the Jade recovered. With information gained through market response and potential sales, the Company will evaluate how best to target the various types of jade in the continuation of its currently permitted trenching activities.

Refer also to 15) Legal Dispute as it pertains to claims made by the vendor of an optioned property within the Wyoming Jade Fields.

• The work conducted in 2019 on the DJ Washington property has increased the exploration potential of the Lode 2 target which was initially drilled over 30 meters of strike length. The trenching and sampling program in Washington confirmed a new in-situ surface nephrite jade occurrence, the widest found on the property to date. The drilling program conducted in October/November 2018 confirmed consistent intersections of Jade that correlates well with mapped surficial Jade. The Company is excited by the discovery of large masses of Rhodonite during its summer 2019 Jade exploration program. If the large block which was shipped to a renowned stone sculptor is considered suitable for carving, and results in a marketable piece of art being created, the Company will be able to begin to establish a value for this Rhodonite. A positive reception from the lapidary/carving industry would lead to further Rhodonite extraction on site.

The next phase of work on the DJ property, which is contingent upon the receipt of sufficient financing, will likely consist of a one week to ten day mechanized bulk sample (backhoe) program, aiming to recover a sufficient amount of jade materials for evaluation and marketing from the road accessible Lode 2 target, where unique chatoyant materials have been found to date. Such a program would have a budget of approximately \$35,000-\$45,000. Permitting for this stage may be required if a notice level exemption cannot be obtained from Forest Services for this planned next phase of work. The Company is currently

evaluating chatoyant materials collected during previous exploration programs with the view to test for market acceptance of these samples.

- There has been an increase in interest in the Rackla belt, which hosts the Tell property, as a result of significant silver, lead and zinc discoveries in the area. If the Company exploring in the same geological belt as Tell continues to have drilling success, there is good potential for the Tell property to attract third party financing or partners to take the property forward based on results obtained to date by the Company on this property. In order to move the property forward an exploration program including a helicopter property wide magnetic/electromagnetic geophysical survey, followed by a second round of diamond drilling would be planned with an estimated budget of \$660,000. However, such a program would only take place given sufficient financing and is currently considered a third exploration priority behind the Jade exploration properties in Wyoming and Washington, USA. The Company will continue to investigate opportunities to option out its Tell property in order to expand exploration on the project without additional financing being required.
- The Company has increased its treasury due to the completion of a private placement financing during Q3 2020. The financing has allowed for the continued operations of the Company as well as execution of the planned summer 2020 exploration programs. The priority of future exploration programs will be on the Wyoming Jades Fields, followed by the DJ Washington programs.
- The Company has worked on increasing visibility and exposure and conducting pre-marketing in International communities through attendance at various trade events in the USA and China during fiscal 2019. During fiscal 2020, the Company has attended conferences in the US and Canada increasing its exposure to the international jade and investing community. Refer to Section 2) b) Corporate highlights for information regarding specific events.
- The Company will also work to expand current and potential investors' awareness of the Company's activities through social media, including its website which hosts videos and other relevant information.

19) Risks

The business and operations of the Company are subject to numerous risks, many of which are beyond the Company's control. The Company considers the risks set out below to be some of the most significant to potential investors in the Company, but not all of the risks associated with an investment in securities of the Company. If any of these risks materialize into actual events or circumstances or other possible additional risks and uncertainties of which the Company is currently unaware or which it considers to be material in relation to the Company's business actually occur, the Company's assets, liabilities, financial condition, results of operation (including future results of operations), business and business prospects, are likely to be materially and adversely affected. In such circumstances, the price of the Company's securities could decline and investors may lose all or part of their investment.

The Company is a natural resource company engaged in the acquisition, exploration and development of mineral properties. Given the nature of the mining business, the limited extent of the Company's assets and the present stage of exploration, the following risk factors, among others, should be considered:

• Exploration, development and operating risks

The Company is in the process of exploring its properties and has not yet determined whether its properties contain economically recoverable reserves and, therefore, does not generate any revenues from production. The recovery of expenditures on mineral properties and the related deferred exploration expenditures are dependent on the existence of economically recoverable mineralization, the ability of the Company to obtain financing necessary to complete the exploration and development of its properties, and upon future profitable production, or alternatively, on the sufficiency of proceeds from disposition. Mineral exploration is highly speculative in nature, involves many risks and frequently is non-productive. There is no assurance that exploration efforts will be successful.

• Substantial capital requirements and liquidity

Substantial additional funds to pursue the Company's potential mineral exploration beyond currently planned expenditures may be required should exploration results indicate that future work may be warranted on any one project, and should any such funding not be fully generated from operations. No assurances can be given that the Company will be able to raise the additional funds that may be required for such activities, should such funds not be fully generated from operations. Mineral prices, environmental rehabilitation or restitution, revenues, taxes, transportation costs, capital expenditures and operating expenses and geological results are all factors which will have an impact on the amount of additional capital that may be required. To meet such funding requirements, the Company may be required to undertake additional equity financing, which would be dilutive to shareholders. Debt financing if available, may also involve restrictions on financing and operating activities. There is no assurance that additional financing will be available on terms acceptable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operation and pursue only those projects that can be funded through cash flows generated from its existing operations, if any.

• Fluctuating mineral prices

The economics of mineral exploration are affected by many factors beyond the Company's control, including commodity prices, the cost of operations, variations in the grade of minerals explored and fluctuations in the market price of minerals. Depending on the price of minerals, the Company may determine that it is impractical to continue a mineral exploration operation. Mineral prices are prone to fluctuations and the marketability of minerals is affected by government regulation relating to price, royalties, allowable production and the importing and exporting of minerals, the effect of which cannot be accurately predicted. There is no assurance that a profitable market will exist for the sale of any minerals found on the Company's properties.

• Regulatory, permit and license requirements

The current or future operations of the Company require permits from various governmental authorities, and such operations are and will be governed by laws and regulations concerning exploration, development, production, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, site safety and other matters. Companies engaged in the exploration and development of mineral properties generally experience increased costs and delays in development and other schedules as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance that all permits which the Company may require for facilities and the conduct of exploration and development operations on the Properties will be obtainable on reasonable terms, or that such laws and regulation will not have an adverse effect on any exploration or development project which the Company might undertake.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in exploration and development operations may be required to compensate those suffering loss or damage by reason of the exploration and development activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations. Amendments to current laws, regulations and permits governing operations and activities of mineral companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or exploration and development costs, or require abandonment or delays in the development of new or existing properties.

• Financing risks and dilution to shareholders

The Company has limited financial resources, no operations and no revenues. If the Company's exploration program on it properties is successful, additional funds will be required for the purposes of further exploration and development. There can be no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be available on favourable terms or

at all. It is likely such additional capital will be raised through the issuance of additional equity which will result in dilution to the Company's shareholders.

• Title to properties

Acquisition of title to mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed. The Company cannot give an assurance that title to its properties will not be challenged or impugned. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify. A successful claim that the Optionors or the Company, as the case may be does not have title to its properties could cause the Company to lose any rights to explore, develop and mine any minerals on its properties without compensation for its prior expenditures relating to its properties.

• Competition

The mineral exploration and development industry is highly competitive. The Company will have to compete with other mining companies, many of which have greater financial, technical and other resources than the Company, for, among other things, the acquisition of mineral claims, leases and other mineral interest as well as for the recruitment and retention of qualified employees and other personnel. Failure to compete successfully against other mining companies could have a material adverse effect on the Company and its prospects.

Reliance on management and dependence on key personnel

The success of the Company will be largely dependent upon the performance of its directors and officers and the ability to attract and retain key personnel. The loss of the services of these persons may have a material adverse effect on the Company's business and prospects. The Company will compete with numerous other companies for the recruitment and retention of qualified employees and contractors. There is no assurance that the Company can maintain the service of its directors and officers or other qualified personnel required to operate its business. Failure to do so could have a material adverse effect on the Company and its prospects.

• Environmental risks

The Company's exploration and appraisal programs will, in general, be subject to approval by regulatory bodies. Additionally, all phases of the mining business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions and provincial and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with mining operations. The legislation also requires that drill sites and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increase capital expenditures and operating costs.

• Conflicts of interest

Certain of the Directors and Officers of the Company are engaged in, and will continue to engage in, other business activities on their own behalf and on behalf of other companies and, as a result of these and other activities, such Directors and Officers of the Company may become subject to conflicts of interest. Canadian corporate laws provide that in the event that a Director has an interest in a contract or proposed contract or agreement, the director shall disclose his interest in such contract or agreement and shall refrain from voting on any matter in respect of such contract or agreement unless otherwise provided under those laws. To the extent that conflicts of interest arise, such conflicts will be resolved in accordance with the provisions of the applicable Canadian corporate laws.

Uninsurable risks

Exploration, development and production operations on mineral properties involve numerous risks, including unexpected or unusual geological operating conditions, rock bursts, cave-ins, fires, floods, earthquakes and other environmental occurrences, any of which could result in damage to, or

destruction of mines and other producing facilities, damage to life or property, environmental damage and possible legal liability. Although precautions to minimize risk will be taken, operations are subject to hazards that may result in environmental pollution and consequent liability that could have a material adverse impact on the business, operations and financial performance of the Company. It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks as a result of high premiums or other reasons. Should such liabilities arise, they could have an adverse impact on the Company's results of operations and financial condition and could cause a decline in the value of the company's shares.

• Litigation

The Company and/or its directors may be subject to a variety of civil or other legal proceedings, with or without merit.

20) Critical Accounting Estimates

The most significant accounting estimate for the Company relates to the carrying value of its exploration and evaluation assets. Exploration and evaluation assets consist of the capitalized costs of exploration on, and acquisition of, mining concessions. Acquisition and leasehold costs and exploration costs are capitalized and deferred until such time as the property is put into production or the properties are disposed of either through sales or abandonments. The estimated values of exploration and evaluation assets are evaluated by management on a regular basis to determine whether facts and circumstances suggest that the carrying amount of the asset may exceed its recoverable amount. Reference is made to project economics, including the timing of the exploration and/or development work, the work programs and exploration results experienced by the Company and others, financing, the extent to which optionees have committed, or are expected to commit to, exploration on the property and the imminent expiry of right to explore, among other factors. When it becomes apparent that the carrying value of a specific property will not be realized an impairment provision is made for the estimated decline in value.

The Company's estimate for decommissioning obligations is based on existing laws, contracts or other policies. The value of the obligation is based on estimated future costs for abandonments and reclamations which require that certain assumptions be made. By their nature, these estimates are subject to measurement uncertainty.

The Company uses the Black-Scholes Option Pricing Model to value stock options and warrants. Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options granted and vested, or warrants issued, during the year.

The Company estimates the fair value of its short-term equity investments at each period end as they are carried at fair value in the Statements of Financial Position. The Company uses the closing price of the common shares on the period-end date and uses the Black-Scholes Option Pricing Model discussed above to estimate the value of its investment in warrants. The price at which these instruments can ultimately be sold will vary from these estimates due to the timing of their sale, the volume of trading in securities at any given time and changes in the market over time, among other factors.

21) New Accounting Policies

IFRS accounting standards, interpretations and amendments subsequent to period-end

Certain new accounting standards, interpretations and amendments to existing standards have been issued by the IASB or IFRIC that are mandatory for periods subsequent to those disclosed in the financial statements. They include the following, but do not include updates that are not applicable or are not consequential to the Company's operations:

IFRS 16 - Leases

According to IFRS 16, all leases will be on the statement of financial position of lessees, except those that meet the limited exception criteria. The standard is effective for annual periods beginning on or after January 1, 2019. The standard is required to be adopted either retrospectively or using a modified retrospective approach. The modified retrospective approach does not required restatement of prior period financial information as it recognizes the cumulative effect of applying the standard to prior periods as an adjustment to opening retained earnings.

The Company adopted IFRS 16 on October 1, 2019 using the modified retrospective approach and applying certain practical expedients available upon transition. The Company has applied a practical expedient that allow the Company to apply a recognition exemption for leases with remaining lease terms of less than 12 months and leases of low value on the transition dates.

As at September 30, 2020, there has been no material impact on the Company's financial reporting relating to the occupancy lease which terminates August 31, 2021.

22) Novel coronavirus pandemic

In early January 2020, a human infection originating in China was traced to a novel strain of coronavirus. The virus has subsequently spread to other parts of the world, including North America and Europe, and has caused unprecedented disruptions in the global economy as efforts to contain the spread of the virus have intensified. On March 11, 2020, the World Health Organization declared this outbreak of coronavirus ("COVID-19") as a pandemic and it continues to spread throughout North America. The full extent and duration of the impact of COVID-19 on the Company's operations and financial performance is currently unknown, and depends on future developments that are uncertain and unpredictable, including the duration and spread of the pandemic, its impact on capital and financial markets on a macro-scale and any new information that may emerge concerning the severity of the virus, its spread to other regions and the actions to contain the virus or treat its impact, among others. The Company was able to conduct its planned exploration program for the summer of 2020, on its properties held in the United States (refer to Note 7 -"Exploration and evaluation assets" to the Audited Consolidated Interim Financial Statements dated September 30, 2020 which accompany this document). There is currently no work travel-related restrictions in place for travel to the US, however this may change. Nevertheless, there are no immediate plans to return to the US properties until further financing is arranged. As the company is an exploration stage company with no revenue sources, there is no impact on revenue from the Corona Virus restrictions. The effect of the virus on the economy as a whole and the amount of discretionary income available to spend on Jade may have an impact on commodity prices, however the Company is not in a position to be producing and selling Jade on a commercial scale at this time.

23) Subsequent events

On October 2, 2020, the Company extended the expiry dates for certain warrants by one year as follows; 1) 3,865,816 warrants expiring on October 12, 2020 will now expire on October 12, 2021 and 2) 730,000 warrants expiring October 23, 2020 will now expire on October 23, 2021. In addition, the exercise price was repriced from \$0.40 per share to \$0.21 per share at that time.

24) Other
